D.H. Griffin Automates Operational Compliance with Powerfleet Unity's AI-Powered Connected Intelligence

WOODCLIFF LAKE, N.J., Sept. 22, 2026 /PRNewswire/ -- Powerfleet, Inc. (Nasdaq: AIOT) (JSE: PWR), a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry, today shared how D.H. Griffin is using Powerfleet Unity's connected intelligence to transform operational compliance from a labor-intensive, paperwork-driven process into a continuous, data-driven discipline.

D.H. Griffin operates across multiple states, performing contract demolition as well as environmental and site development services. It was founded in 1959 and is headquartered in Greensboro, North Carolina. Operating more than 1,200 assets and supporting 1,500 employees, D.H. Griffin manages a complex compliance environment spanning drivers, vehicles, yellow iron, equipment, maintenance, certifications, inspections, and audits. Powerfleet turns that information into AI-powered connected intelligence with compliance automation, giving the organization a unified and automated compliance operation while reducing the administrative burden on its safety teams.

By automating processes that previously required manual verification - including driver hours, maintenance records, certifications, audits, and supporting documentation - D.H. Griffin can automatically identify emerging issues earlier and act before they become larger compliance or operational risks.

The result is a proactive approach to compliance: continuous visibility, earlier intervention, stronger accountability, and more time for safety professionals to focus on continuous improvement, training, prevention, and strategic planning.

"Instead of chasing compliance, we design it into every process. It's continuous, predictive, and visible," said Adam Swartz, Fleet Executive at D.H. Griffin. "Powerfleet is more than a technology provider; they are a partner. They understand our business, our people, and our challenges, and they have helped us create a closed-loop compliance ecosystem that connects data, action, and accountability."

D.H. Griffin has upgraded its Powerfleet footprint with the progressive rollout of Unity's AI video safety solution, citing that it has already helped to disprove false incident claims and improve operational safety and risk.

ABOUT POWERFLEET

Powerfleet (Nasdaq: [AIOT](#); JSE: PWR) is a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry.
