Information Systems Associates, Inc. completes large Telco data center audit with over 98% accuracy

Billed \$500K on Project Spanning 12 Months and Multiple Data Centers

Stuart, Florida, Oct. 10, 2013 (GLOBE NEWSWIRE) -- Information Systems Associates, Inc. (IOSA: OTCQB), a leading provider of Data Center Asset Management (DCAM) solutions, services and consulting, announced today that it recently completed a 12-month long data center audit for a national Telco. The project, in concert with one of ISA's DCIM partners, was undertaken by its Professional Services team and encompassed data centers across the United States. The objective was to give the client an accurate data set to be used within a DCIM system so that promised efficiencies in power management, asset utilization and floor space can be achieved. The team accomplished an accuracy of over 98% in identifying and mapping more than 36,000 assets over 6 data centers, including racks and floor mounted devices located in multiple data centers throughout the United States. The company has also been retained previously as a consultant to independently verify audits..

Commenting on the successful completion of this latest data center audit, Joe Coschera, ISA's Chief Executive Officer said, "We are very proud to have been selected to provide the data center audit services for this client and achieving a level of accuracy significantly higher than the benchmark. Our staff of dedicated auditors worked diligently throughout the project to ensure the timely completion of the project."

Utilizing a patented mobile data center asset management process and OSPI software, the audit team received crucial real-time feedback on the accuracy of the data being collected. This allowed them to quickly collect the data and produce timely reports. ISA's focus within the DCIM space is data integrity which is the key requirement in how to efficiently manage data center growth. ISA's software can either be used by its clients as a standalone system or in conjunction with its Professional Services team. The software also interfaces to other DCIM systems to provide very efficient data collection and auditing of existing assets.

About Information Systems Associates

Information Systems Associates, Inc. (OTQB: IOSA) based in Stuart, FL, is a leading provider of Mobile Data Center Management systems and turnkey data center management solutions. The suite of products and services include data center asset/inventory management, data center management software and data center data collection. Utilizing a proprietary and patented technology, OSPI (On Site Physical Inventory), customers manage data centers on a mobile basis, bringing data center management out of the office and into the data center. Information Systems Associates holds the trademarks for On Site Physical Inventory, OSPI and Mobile Data Center Management.
