Sutro Biopharma to Present New Preclinical Data on its STRO-002 Antibody-Drug Conjugate at the Upcoming AACR 2020 Virtual Meeting on June 22, 2020

Additionally, Sutro's partner Merck KGaA, Darmstadt, Germany, will be unveiling preclinical data from the collaboration's pre-Development Candidate, a first-in-class bispecific antibody-drug conjugate targeting EGFR and MUC1

SOUTH SAN FRANCISCO, Calif., June 9, 2020 /PRNewswire/ -- Sutro Biopharma, Inc. (NASDAQ: STRO), a clinical-stage drug discovery, development and manufacturing company focused on the application of precise protein engineering and rational design to create next-generation oncology therapeutics, today announced that the company will present new preclinical data for its folate receptor alpha targeting antibody-drug conjugate, STRO-002, at the American Association for Cancer Research (AACR) Virtual Annual Meeting II being held June 22-24, 2020.

Additionally, Sutro's partner Merck KGaA, Darmstadt, Germany, will be presenting preclinical data from the collaboration's pre-Development Candidate, M1231, a first-in-class bispecific antibody-drug conjugate targeting EGFR and MUC1.

Presentation Details:

Title:	STRO-002, an anti-FolR α ADC, demonstrates immune-modulating properties and potentiates PD-L1 blockade
Abstract Number:	2250
Session Title:	Immune Mechanisms Invoked by Therapies 2
Date/Time:	June 22, 2020, 9:00 a.m. – 6:00 p.m. EDT
Presenter:	Trevor Hallam, Ph.D.
Title:	M1231: A first-in-class bispecific antibody-drug conjugate targeting EGFR and MUC1
Abstract Number:	5686
Session Title:	Emerging Mechanisms of Resistance to Targeted Therapies
Date/Time:	June 24, 2020, 10:05 a.m. – 10:15 a.m. EDT
Presenter:	Jan Anderl, Ph.D.

The abstracts can be found on the [AACR website](#). The Sutro virtual poster presentation will be on the AACR website on June 22, 2020, and will be also accessible through the Clinical/Scientific Presentation and Publication Highlights page of the News section of Sutro's website at www.sutrobio.com on the day of the poster presentation.

About Sutro Biopharma

Sutro Biopharma, Inc., located in South San Francisco, is a clinical-stage drug discovery, development and manufacturing company. Using precise protein engineering and rational design, Sutro is advancing next-generation oncology therapeutics.

Sutro's proprietary and integrated cell-free protein synthesis platform XpressCF® and site-specific conjugation platform, XpressCF+™, led to the discovery of STRO-001 and STRO-002, Sutro's first two internally-developed ADCs. STRO-001 is a CD74-targeting ADC currently being investigated in a Phase 1 clinical trial of patients with advanced B-cell malignancies, including multiple myeloma and non-Hodgkin lymphoma. STRO-001 was granted Orphan Drug Designation by the FDA for multiple myeloma in October 2018. STRO-002 is a folate receptor alpha (FolRα)-targeting ADC, currently being investigated in a Phase 1 clinical trial of patients with ovarian and endometrial cancers. This is the second product candidate to be evaluated in clinical trials resulting from Sutro's XpressCF® and XpressCF+™ technology platforms. A third program, CC-99712 (BCMA-targeting ADC), which is part of Sutro's collaboration with Bristol Myers Squibb (formerly Celgene Corporation), is enrolling patients for its Phase 1 clinical trial of patients with multiple myeloma. Sutro's proprietary technology was responsible for the discovery and manufacturing of CC-99712, for which Bristol Myers Squibb has worldwide development and commercialization rights. Sutro is entitled to development and regulatory milestone payments and tiered royalties from Bristol Myers Squibb for this BCMA ADC. Sutro is dedicated to transforming the lives of cancer patients by creating medicines with improved therapeutic profiles for areas of unmet need.

To date, Sutro has designed cytokine-based immuno-oncology therapies, ADCs, vaccines and bispecific antibodies primarily directed at clinically-validated targets for which the current standard of care is suboptimal.

Sutro's platform allows it to accelerate discovery and development of potential first-in-class and best-in-class molecules through rapid and systematic evaluation of protein structure-activity relationships to create optimized homogeneous product candidates.

In addition to developing its own oncology pipeline, Sutro is collaborating with select pharmaceutical and biotech companies to discover and develop novel, next-generation therapeutics. As the pace of clinical development accelerates, Sutro and its partners are developing therapeutics designed to more efficiently kill tumors without harming healthy cells.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including, but not limited to, anticipated preclinical and clinical development activities, timing of announcements of clinical results, potential benefits of the company's product candidates and platform and potential market opportunities for the company's product candidates. All statements other than statements of historical fact are statements that could be deemed forward-looking statements. Although the company believes that the expectations reflected in such forward-looking statements are reasonable, the company cannot guarantee future events, results, actions, levels of activity, performance or achievements, and the timing and results of biotechnology development and potential regulatory approval is inherently

uncertain. Forward-looking statements are subject to risks and uncertainties that may cause the company's actual activities or results to differ significantly from those expressed in any forward-looking statement, including risks and uncertainties related to the company's ability to advance its product candidates, the receipt and timing of potential regulatory designations, approvals and commercialization of product candidates, the impact of the COVID-19 pandemic on the Company's business, clinical trial sites, supply chain and manufacturing facilities, the Company's ability to maintain and recognize the benefits of certain designations received by product candidates, the timing and results of preclinical and clinical trials, the company's ability to fund development activities and achieve development goals, the company's ability to protect intellectual property, and the Company's commercial collaborations with third parties and other risks and uncertainties described under the heading "Risk Factors" in documents the company files from time to time with the Securities and Exchange Commission. These forward-looking statements speak only as of the date of this press release, and the company undertakes no obligation to revise or update any forward-looking statements to reflect events or circumstances after the date hereof.
