

# QuickLogic Investor Presentation

March 2019 NASDAQ: QUIK

### Safe Harbor Statement

This press release contains forward-looking statements regarding our future business expectations, which are subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are only predictions and may differ materially from actual results due to a variety of factors including: delays in the market acceptance of the Company's new products; the ability to convert design opportunities into customer revenue; our ability to replace revenue from end-of-life products; the level and timing of customer design activity; the market acceptance of our customers' products; the risk that new orders may not result in future revenue; our ability to introduce and produce new products based on advanced wafer technology on a timely basis; our ability to adequately market the low power, competitive pricing and short time-to-market of our new products; intense competition, including the introduction of new products by competitors; our ability to hire and retain qualified personnel; changes in product demand or supply; capacity constraints; and general economic conditions. These and other potential factors and uncertainties that could cause actual results to differ from the results predicted are described in more detail in the Company's public reports filed with the Securities and Exchange Commission (the "SEC"), including the risks discussed in the "Risk Factors" section in the Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and in the Company's prior press releases, which are available on the Company's Investor Relations website at <a href="http://ir.quicklogic.com/">http://ir.quicklogic.com/</a> and on the SEC website at <a href="http://ir.quicklogic.com/">http://ir.quicklogic.com/</a> and on the SEC website at <a href="http://ir.quicklogic.com/">http://ir.quicklogic.com/</a> and on

QuickLogic uses its website, the company blog QuickLogic HotSpot, corporate Twitter account, Facebook page, and LinkedIn page as channels of distribution of information about its products, its planned financial and other announcements, its attendance at upcoming investor and industry conferences, and other matters. Such information may be deemed material information, and QuickLogic may use these channels to comply with its disclosure obligations under Regulation FD.

## Company Overview

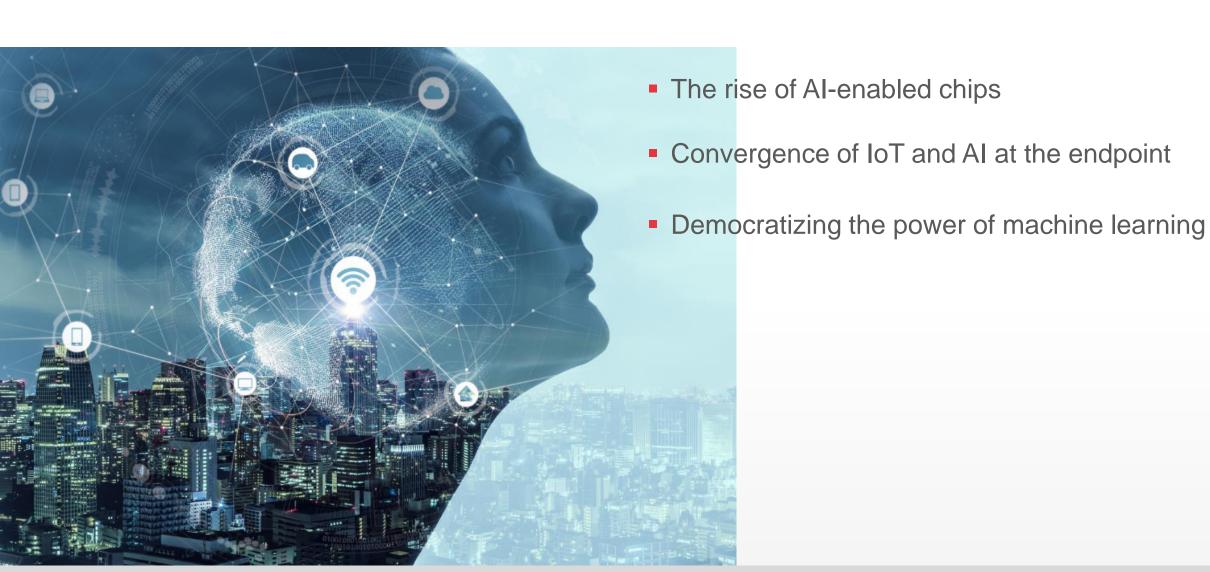

- Full-stack semiconductor solutions company enabling significantly longer battery life
   & immersive user experience for Smartphones, Wearables, Hearables, Tablets,
   Consumer Electronics, Industrial & IoT
- Practical, end-to-end solution for localized AI in edge and endpoint devices

## Al at the Edge

## Recent Developments

# SensiML Transformative Acquisition Creating Inflection Point

- SensiML Software-as-a-Service AI company
- Former Intel AI software team with core competence in ML/AI on low power embedded H/W
- Cross leverage between SensiML's software suite, QuickLogic's QuickAI<sup>™</sup> platforms, and QuickLogic eFPGA IP – enables full-stack solution from semiconductor IP to SoC to Software
- Practicable End-to-End solution for emerging Edge/Endpoint AI market
- Target positive EBITDA of SensiML business unit for FY 2019
- Drives higher SaaS margins and "stickier" revenues / subscription model

## Recent Accomplishments

- EOS<sup>TM</sup> S3AI Platform single chip hardware and software solution for AI in edge/endpoint
- JD.com & SF Technology Company released new Bluetooth headsets designed with EOS S3
- Received first material revenue from QuickAl in fourth quarter 2018
- Signed 3rd Master Technology License Agreement (MTLA) and license revenue for eFPGA

### Investment Rationale

### **Addressing Critical Needs**

Delivering a practical, end-to-end solution for AI where battery life, bandwidth, latency and security are critical

### **Top Tier Customers** and Ecosystem **Partners**

### Competitive **Advantages**

- ~100 patents in core IP
- eFPGA hardware accelerators optimize endpoint AI applications
- Practical end-to-end AI solution, from semiconductor IP through SaaS software
- Ecosystem partnerships with industry leaders

### **Driving to Profitable** Growth

- Secured numerous SoC design wins for Smartphone, Wearable, Hearable, Tablet, Consumer Electronics, Industrial and IoT markets
- Executing license agreements for eFPGA IP
- Expanding market for technology with QuickAI<sup>TM</sup> platform for endpoint AI applications
- SensiML acquisition expands AI capability and Served Available Market

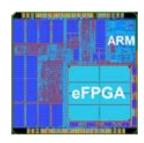

## **Product Lines**

## Voice / Sensor Processing System-on-Chip

 Multi-core SoC for sensor processing, Endpoint Devices, Artificial Intelligence, immersive user experience of sensor fusion and always-on deeply embedded voice recognition

## Embedded FPGA IP Licensing (eFPGA) & devices

 Enables pre-processing for Artificial Intelligence in Edge and Endpoint Devices

### SensiML AI Software Platform

SaaS AI software Tool
Kit that makes building
intelligent endpoint IoT
products practical by
democratizing the
application of AI to
Software Developers

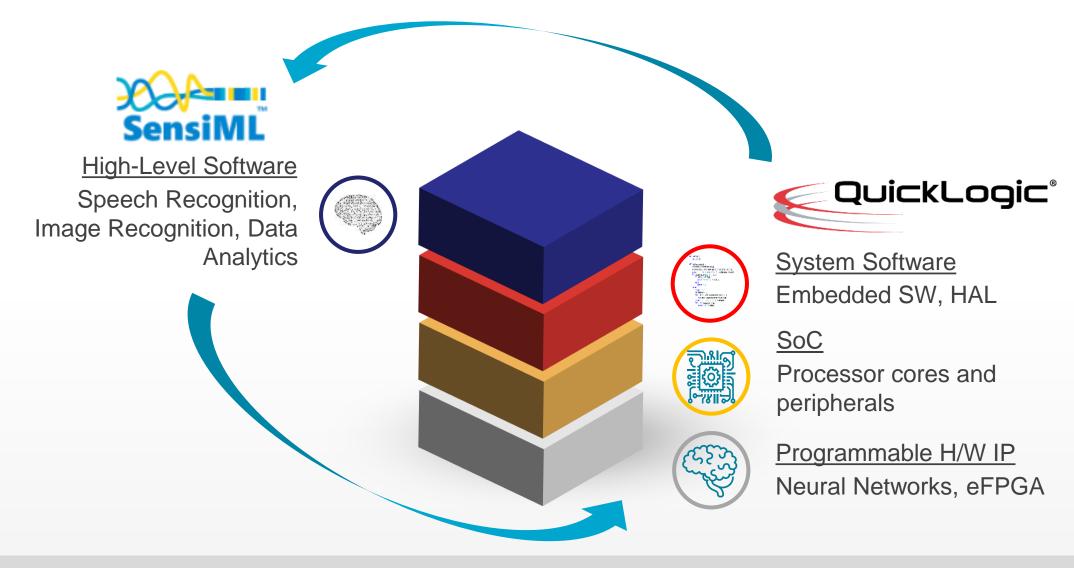

### **Display Bridges & Connectivity**

 Solves interface mismatches between Application Processors and Displays

## Cross-Leverage of the Full-Stack Solution

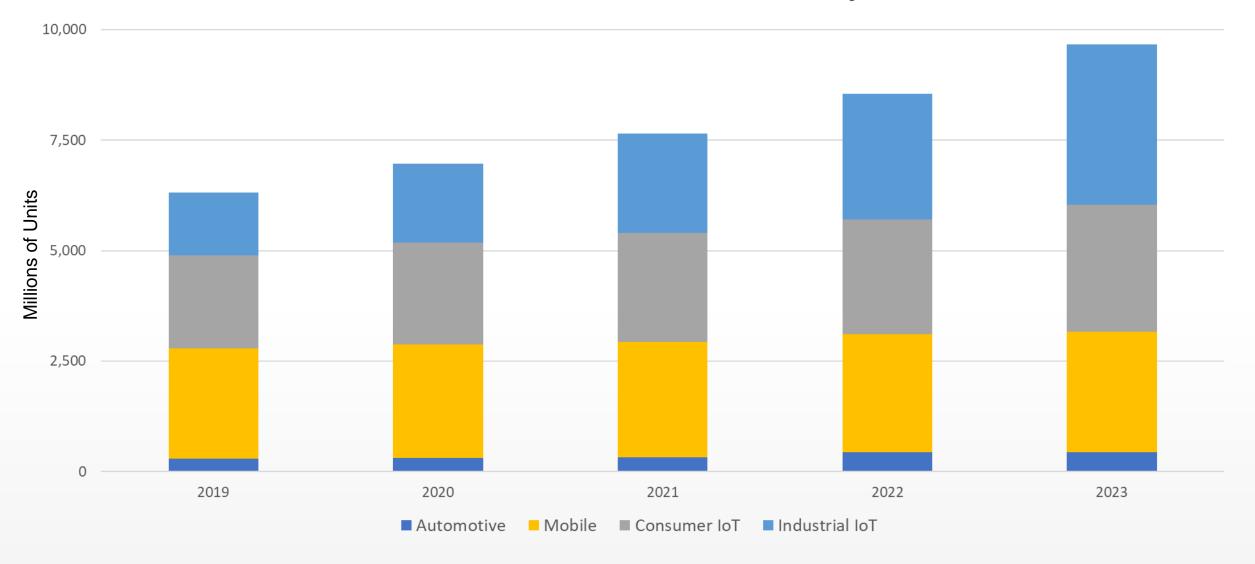

# Voice / Sensor Processing SoC

## IoT Market Growth – A ~10B Unit Market by 2023

## Immersive User Experience Requires More Sensors

### **Motion Sensors**

**Biological Sensors** 

**Heart Rate Temp Blood Press** 

### **Environmental Sensors**

**Ambient** 

## Always-Listening Driven by Cloud Platform Providers

## Expanding Ecosystem Partnerships With Industry Leaders Immersive User Experience & Artificial Intelligence at the Endpoint

Leading supplier of deeply embedded voice recognition technology

Global developer of embedded audio digital signal processing solutions

Smarter Things

World leading vendor of Bluetooth® low energy Systems-on-Chip (SoCs)

Produces the NM500, a NeuroMem-based IC that enables artificial & intelligence in endpoint solutions

Leading-edge software tools that enable the quick and easy generation of application-specific pattern recognition code.

Leading supplier of
Android-compliant
sensor fusion
algorithms for Chinese
OEMs

A total solution company for audio products

Rapidly growing leading enterprise provider of Artificial Intelligence (AI) speech technology

The inventor of NeuroMem, a scalable neural network technology

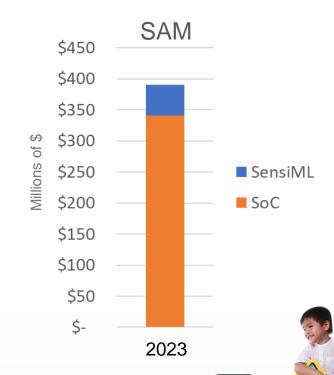

## Consumer Application Example – Voice-Enabled Products

■ Consumer IoT

■ Mobile

~\$400M SAM created through cross-leverage of full-stack offering

**Smart Speakers** 

Integrating always-on voice at very low power with additional sensors for user experience

### Solution

- EOS S3 Platform for Sensor & Voice Processing
- Optional SensiML AI toolkit for development of unique sensor algorithms

**CE & Appliances** 

**Wearables** 

## Sensor Processing SoC Market Adoption

### Ramping Now

### **Platform Wins**

- Japanese OEM standardizing on EOS S3 SoC for all MCU applications in smartphones, feature phones & IoT products
- Large CE product win launched at CES 2019
- EOS S3 engagement with a leading Consumer Goods company for a high volume AC powered always-on / alwayslistening application

### <u>Wearables</u>

 Naver Labs in Korea (\$20B market cap) – Smartwatch Korea Telecom (KT)

### **Tablets**

 Large Chinese OEM, EEBBK – Shipping in two Design Wins

## :S

### Hearables

- JD.com shipping its new Pilot U-LIFE N1 smart headset
- 1More's Always-On Always-Listening Bluetooth Headset associated with large Chinese company shipping now
- SF Technology Company, Ltd. initiated deployment of its Xiaofeng Smart Bluetooth® Headset

### **Ecosystem**

- Murata introduced battery-powered WiFi Smart Speaker in May 2018 at Japan IoT Show
- Ultra-low power Amazon Alexa support for products using Qualcomm Bluetooth audio SoCs

# eFPGA Intellectual Property Licensing

# Licensing Model Brings New High Margin Business eFPGA IP Licensing Positioning ArcticPres

- Targets significant financial potential
  - \$10M+ potential annual licensing revenue with upside on royalty revenue in 2+ years
- Creates new, high gross margin manufacturing licenses revenue streams
- Delivers flexibility and reduced R&D costs for SoC vendors

The embedded semiconductor intellectual property (IP) market is expected to grow from \$3.09B to over \$7B by 2022, according to Markets&Markets.

### eFPGA - Market Momentum

 ETH Zurich has taped out Parallel Ultra Low Power (PULP) platform targeting GLOBALFOUNDRIES' 22FDX using QuickLogic eFPGA

- Strategic eFPGA Partnership with C-SKY Microsystems for C-SKY's ultra-low power common CPU platform
- Signed 3<sup>rd</sup> MTLA / License Agreement in Q4'2018
- Joined RISC-V Foundation to broaden the adoption of opensource architecture and ecosystems and to leverage the eFPGA IP

## SensiML AI Software Platform

## The SensiML Team

## **Former Intel**<sup>™</sup> Curie and Quark AI Software Team

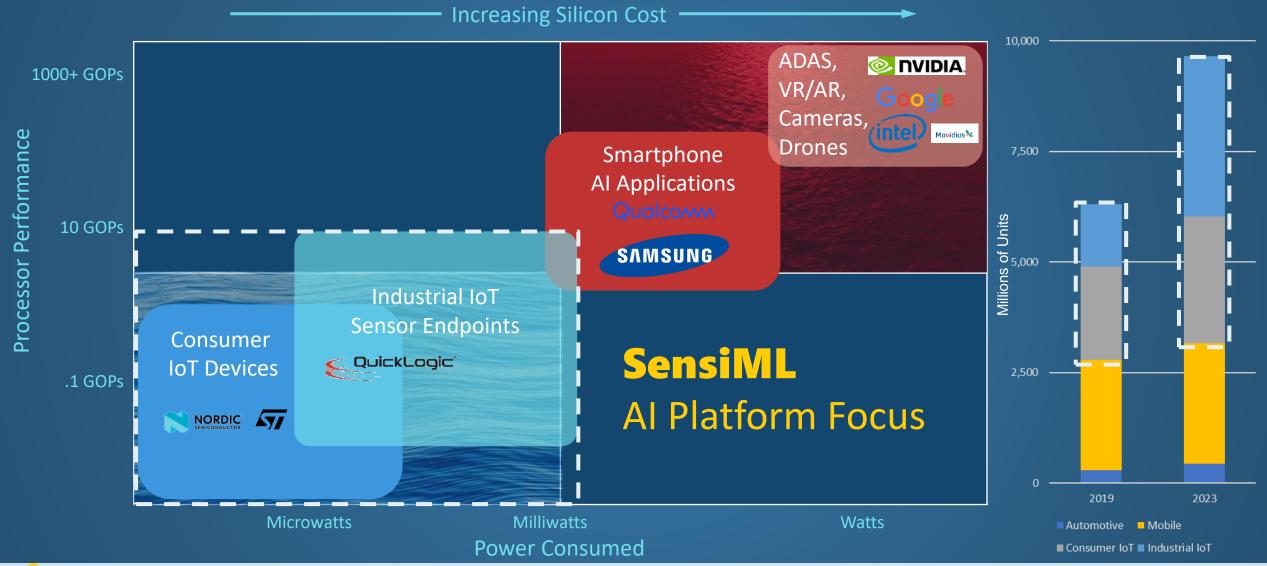

- Acquired Intel Knowledge Builder IP as spin-out in 2017
- Core competence in ML/AI on low-power embedded HW
- Intact core product team in Portland, Oregon formed in 2012

Established Software-as-a-Service (SaaS) Subscription and per unit royalty model

with nearly \$250M Served Available Market

## Edge and Endpoint AI: Platform Segments

Source: ABI Research 2019

## QuickLogic and SensiML

## Highly Aligned Visions, Complementary HW / SW

Complete Solution Intelligent IoT Endpoints

Hardware Optimizing Endpoint AI Software Toolkit

3<sup>rd</sup> Party Algorithm Extensions

Heterogeneous Core Accelerator Libs (FFE, FPGA, NM)

3<sup>rd</sup> Party Accel Libs (ex. ARM CMSIS DSP)

QuickLogic

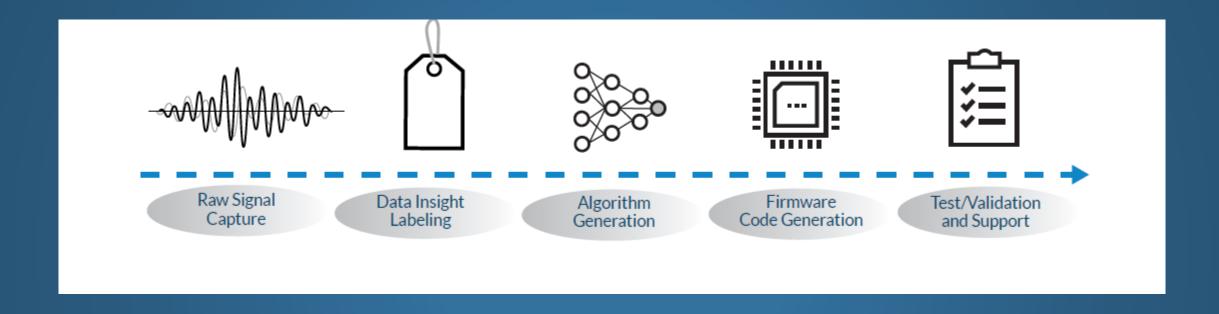

QuickAI<sup>™</sup> EOS<sup>™</sup> S3AI 3<sup>rd</sup> Party Embedded SoCs

ArcticPro.

3<sup>rd</sup> Party Embedded Platforms

## Building Intelligent Endpoints Quickly and Easily

"Many semiconductor companies...have to understand the entire IoT stack's requirement, and in some cases, create an end-to-end solution that facilitates market adoption."... Deloitte, July 2018

## What Problem Are We Solving?

Teach Device To Recognize
Insights From Sensor Data and
Prior Insights

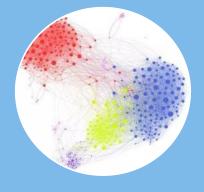

Mine Available Data to Spot Trends and Gain New Insights

Optimize a Unknown Process
Through Reward-Based
Learning

Supervised Learning

Uses labeled training data to "teach" desired insights

**Unsupervised Learning** 

No labels used during learning, algorithm discovers similarities itself

Reinforcement Learning

No training data or labels, learning through maximizing outcomes

Nearly all smart IoT endpoints rely on supervised learning where labeled training data is vitally important

# QuickAl Bringing Al to The Endpoint

## Endpoint IoT SAM for QuickAl

## QuickAl Applications and Market Momentum

- Industrial Predictive Maintenance
- Structural Health Monitoring

Vision Inspection for Smart Agriculture

- Forecasting first material QuickAl revenue for Q4 2018
- mtes Neural Networks
  Selects QuickLogic's
  QuickAl HW/SW Platform
  for Al-Enabled Endpoint
  Devices

## IoT Al Application - Predictive Maintenance and Structural Health

>\$650M SAM created through cross-leverage of full-stack offering

**Bearings** 

**Motors** 

**Buildings** 

### Challenges

- No 'one size fits all' solution
- Cost and Power of sending data to cloud

### Solution

- SensiML toolkit for Data Collection, Segmenting, Labeling, ML and Al Model Creation
- EOS S3 AI Platform for Low Power Sensor Processing

**White Goods** 

**Bridges** 

## Enabling Artificial Intelligence at the Endpoint - QuickAl

## Introducing a Complete Al Platform Solution

- Supported by an Ecosystem of partners
- Enables AI at the Endpoint device

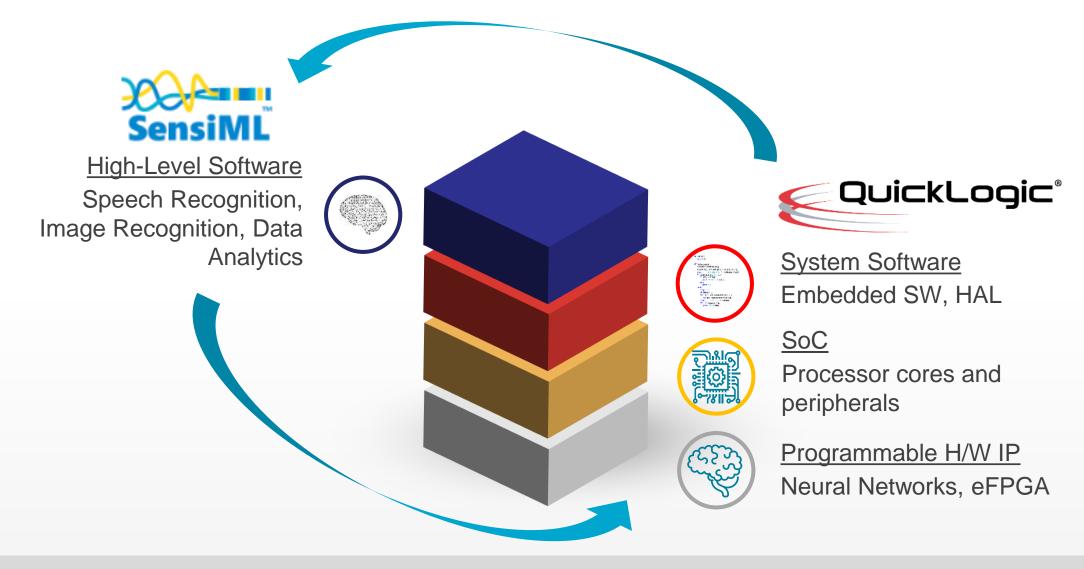

### Benefits

- Includes Sensor Processing platform, Neurons for Al computing, and Application SW for Knowledge building of data and classification
- Scaling across bigger AI systems
- No need for in-house expertise of data analytics, DSP Processing, App Coding

### Target Applications

- Industrial IoT
- Predictive Maintenance applications
- Vision Inspection System

## Cross-Leverage of the Full-Stack Solution

## Why Now?

## Ramping Strategic New Product Revenue

Numerous design wins in Consumer, driven by Voice-enabled solutions

### Transforming to Full-Stack Edge/Endpoint Al Company

- SensiML acquisition brings AI technology and expanded SAM with SaaS revenue
- Executing license agreements for eFPGA IP
- Expanding SAM into Industrial IoT with QuickAI + SensiML AI Software

# Building a More Efficient and Effective Growth Engine

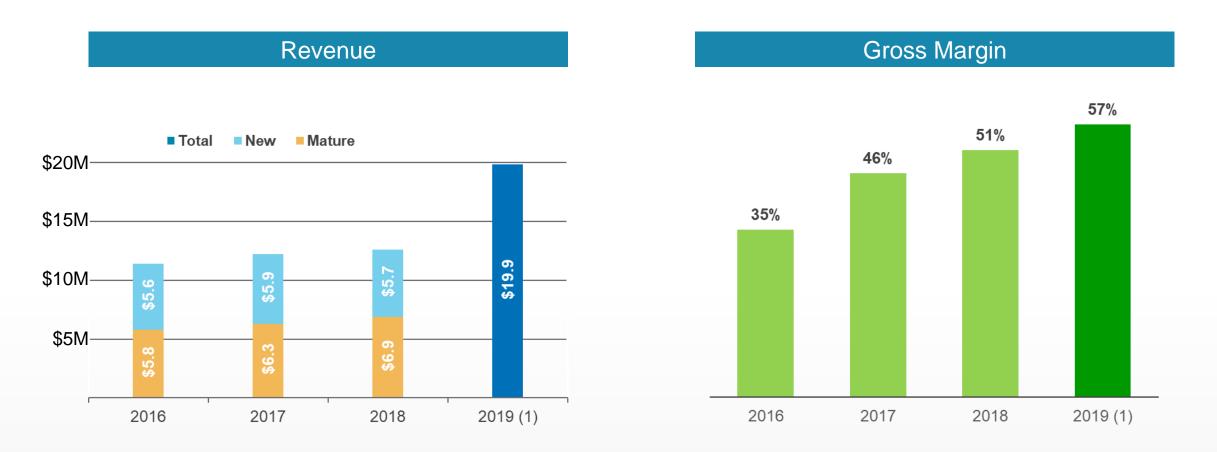

Higher gross margin/stickier revenue driving to profitability

## **Financial Overview**

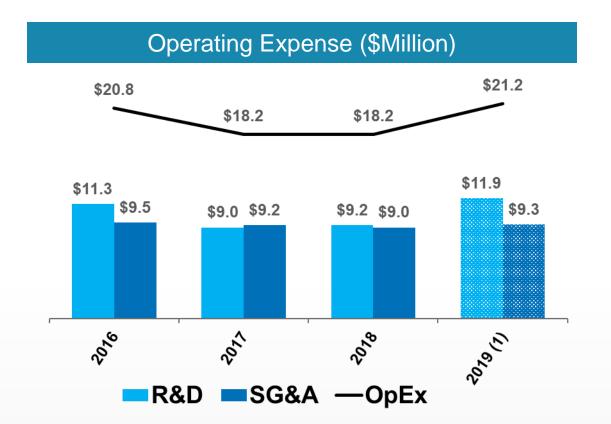

## Financial Highlights

(1) Based on analyst consensus estimates as of February 14, 2019

## Financial Highlights

Balance Sheet Data (Millions)	12/31/2018
Total Cash	\$26.5
Bank Debt – <i>5.75% Int.</i>	\$15.0

Increased revolving line of credit to \$15M in Dec. 2018

(1) Based on analyst consensus estimates as of February 14, 2019

## QuickLogic Leadership

### **Brian Faith**

Chief Executive Officer, Director

- Joined in 1996
- CEO in 2016
- VP of Worldwide Marketing/ VP of Worldwide Sales & Marketing 2008-2016
- Rising managerial & executive positions, including engineering, product line management, marketing and sales

### Sue Cheung, Ph.D.

Chief Financial Officer

- · Joined in 2007
- CFO in 2017
- VP of Finance/CAO since 2015, Corporate Controller 2007-2015
- Sr. Accounting management positions at Dell SonicWALL, VeriFone and other publicly traded and privately held companies
- Certified Public Accountant (CPA)
- Doctorate in Business Administration

### Timothy Saxe, Ph.D.

Chief Technology Officer &

SVP Engineering

- Joined in 2001
- CTO in 2008, SVP of Eng. in 2016
- Rising executive positions including VP of Eng. and VP of Software Eng.
- VP of FLASH Engineering at Actel Corp. and founder/CEO of semiconductor mfg. division at GateField Corp. (Zycad)
- Doctorate in Electrical Engineering

### Rajiv Jain

VP Worldwide Operations

- Joined in 1992
- VP Worldwide Ops in 2014
- Sr. Dir. of Operations & Development Eng., Sr. Dir. of System Solutions & Process Technology, Dir. of Process Technology, and Sr. Process Technologist 1992-2014
- Sr. Engineering positions at National Semiconductor and Monolithic Memories

### E. Thomas Hart Michael R. Farese

#### Chairman

- QuickLogic CEO 1994-2009
- VP & GM of Advanced Networking Division at National Semiconductor Corp.
- Senior Manager, Motorola, Inc.

### Director

 35 years in executive roles in telecomm & semiconductor industry including Antenna29; Entropic Comm. Inc.; BitWave Semicon, Palm; WJ Comm; Tropian Inc.; Motorola Corp.; Ericsson Inc.; Nokia Corp.; ITT Corp.; AT&T Corp.; and Bell Labs

### Arturo Krueger

#### **Director**

- Over 40 years leadership in systems architecture, semiconductor design & development, operations and marketing
- Executive roles at Motorola, Inc. semiconductor products; Director, Marvell Technology Group Ltd

### Andrew J. Pease

#### Director

- QuickLogic CEO/President 2009-2016, VP Worldwide Sales 2006-2009
- Executive roles at Broadcom Corp.; Syntricity, Inc.
- Various sales positions at Advanced Micro Devices; Integrated Systems Inc.; and Vantis Corp.

### Director

- VP of Connectivity, Facebook
- COO, Ruckus Wireless, Inc.
- Executive roles at Qualcomm Atheros, Inc.; Atheros Communications; NXP Semiconductors; ST Ericsson; and Silicon Labs

#### Director

- CFO, PDF Solutions, Inc.
- CFO, UniPixel, Inc., Vendavo, Inc.,
- CFO positions at Evans Analytical Group; Virage Logic Corp.;OuterBay; Ceva, Inc.; and Persistence Software, Inc.

### Daniel A. Rabinovitsj Christine Russell Gary H. Tauss

- Director
- Exec. Director & CEO, BizTech
- Executive roles at Mobidia Technology, Inc.; InfiniRoute Networks, Inc.; LongBoard, Inc.; and TollBridge Technologies

# Thank You!

# Appendix

## Non-GAAP Measures

QuickLogic reports financial information in accordance with GAAP, but believes that non-GAAP financial measures are helpful in evaluating its operating results and comparing its performance to comparable companies. Accordingly, the Company excludes charges related to stock-based compensation, restructuring, the effect of the write-off of long-lived assets and the tax effect on other comprehensive income in calculating non-GAAP (i) income (loss) from operations, (ii) net income (loss), (iii) net income (loss) per share, and (iv) gross margin percentage. The Company provides this non-GAAP information to enable investors to evaluate its operating results in a manner similar to how the Company analyzes its operating results and to provide consistency and comparability with similar companies in the Company's industry. Management uses the non-GAAP measures, which exclude gains, losses and other charges that are considered by management to be outside of the Company's core operating results, internally to evaluate its operating performance against results in prior periods and its operating plans and forecasts. In addition, the non-GAAP measures are used to plan for the Company's future periods, and serve as a basis for the allocation of the Company's resources, management of operations and the measurement of profit-dependent cash and equity compensation paid to employees and executive officers. Investors should note, however, that the non-GAAP financial measures used by QuickLogic may not be the same non-GAAP financial measures, and may not be calculated in the same manner, as that of other companies. QuickLogic does not itself, nor does it suggest that investors should, consider such non-GAAP financial measures alone or as a substitute for financial information prepared in accordance with GAAP. A reconciliation of GAAP financial measures to non-GAAP financial measures is included in the financial statements portion of this press release. Investors are encouraged to review the related GAAP financial measures and the reconciliation of non-GAAP financial measures with their most directly comparable GAAP financial measures.

## P&L - Non-GAAP

Non-GAAP Results Millions (except for EPS)	Q1'18 Actual	Q2'18 Actual	Q3'18 Actual	Q4'18 Actual
New Product Revenue	\$1.3	\$1.6	\$1.5	\$1.3
Mature Revenue	\$1.5	\$1.5	\$2.0	\$1.9
Total Revenue	\$2.8	\$3.1	\$3.5	\$3.2
Gross Margin %	52%	50%	51%	53%
Research & Development	\$2.5	\$2.2	\$2.2	\$2.3
SG&A	\$2.3	\$2.3	\$2.2	\$2.0
Total Operating Expense	\$4.9	\$4.5	\$4.5	\$4.3
Operating Income (Loss)	(\$3.4)	(\$3.0)	(\$2.7)	(\$2.6)
Net Income (Loss)	(\$3.5)	(\$3.0)	(\$2.7)	(\$2.6)
EPS	(\$0.04)	(\$0.04)	(\$0.03)	(\$0.03)

## GAAP to Non-GAAP Reconciliation

	Q1'18	Q2'18	Q3'18	Q4'18	
(In \$ '000)	Actual	Actual	Actual	Actual	
Non-GAAP Operating Loss	\$ (3,434)	\$ (2,967)	\$ (2,711)	\$ (2,578)	
Stock-based Compensation	(432)	(479)	(516)	(474)	
Restructuring Costs	-	-	-	-	
FA impairment and/or write-off	(5)	-	-	-	
GAAP Operating Loss	\$ (3,871)	\$ (3,446)	\$ (3,227)	\$ (3,052)	

Non-GAAP Net Loss	\$ (3,533)	\$ (3,005)	\$ (2,744)	\$ (2,591)
Adjustments:				
Stock-based Compensation	(432)	(479)	(516)	(474)
FA impairment and/or write-off	(5)	-	-	-
GAAP Net Loss	\$ (3,970)	\$ (3,484)	\$ (3,260)	\$ (3,065)

## EOS S3 Multi-Core SoC Platform
