Inpixon and Hewlett Packard Enterprise Announce West Coast Synergy Series

"Data Center of the Future" seminars debut in San Diego, Seattle and San Francisco

PALO ALTO, Calif.--(BUSINESS WIRE)-- [Inpixon](#) (NASDAQ: INPX), a leading indoor positioning and data analytics company, and [Hewlett Packard Enterprise](#) (HPE) today announced a series of baseball-themed seminars focused on HPE's Synergy – a new category of infrastructure that accelerates application delivery in both traditional and new IT environments. The solution brings the "Data Center of the Future" to senior IT audiences at West Coast Major League Baseball venues, beginning with San Diego on Friday, April 7, 2017.

"In this age of Big Data, IoT and constant security threats, lines of business are demanding that their IT departments deliver the infrastructure needed to develop and deploy new applications faster," said Bret Osborn, Chief Sales Officer at Inpixon. "HPE Synergy is today's new hybrid IT engine—built to future-proof your data center for today's workloads and tomorrow's disruptors. Our seminar series will show how HPE Synergy cuts data center costs and slashes the time it takes to spin up new applications for any workload at cloud-like speed."

According to HPE's Chuck Smith, VP and General Manager, North American Datacenter and Hybrid Cloud, "Synergy combines storage, compute and network equipment in one chassis, along with management software that can quickly configure the hardware automatically to provide just the right resources needed to run an application."

"HPE Synergy's unique built-in software intelligence, auto-discovery capabilities and fluid resource pools enable customers to instantly boot up infrastructure ready to run physical, virtual and containerized applications," Smith said. "We are thrilled to be partnering with Inpixon to enlighten and educate local IT professionals about Synergy, and also enjoying a baseball game with Synergy seminar attendees."
