Inpixon Forges Partnership with GTRI to Boost Physical Cybersecurity Offerings

GTRI to avail Inpixon IPA Security Dome to help secure enterprise and governmental premises

PALO ALTO, Calif.--(BUSINESS WIRE)-- [Inpixon](#) (NASDAQ:INPX), a leading indoor positioning and data analytics company, today announced a partnership with [GTRI](#), an innovator in IT consulting and services, to render comprehensive three-dimensional physical cybersecurity solutions, including Inpixon Indoor Positioning Analytics (IPA) Security Dome, for physical premises, airwaves and wireless devices.

Inpixon IPA Security Dome detects all transmitting signals within a physical zone to address the vulnerabilities of unknown Internet of Things (IoT) devices infiltrating the area and reinforce physical cybersecurity for both organizations and individuals. GTRI will leverage the technology to enable government organizations and enterprises to identify, prioritize and isolate any potential exposures while upholding availability, security and compliance standards and regulations.

“Our partnership with GTRI, one of the top Federal solution provider firms in the United States, strengthens our reach in the security market by delivering the benefits of advanced security and visibility to combat risks associated with Bring-Your-Own-Device (BYOD) and IoT,” said Nadir Ali, CEO of Inpixon.

“The addition of Inpixon to our partner community further bolsters the wireless network security and compliance offerings we offer customers in the classified space of the Federal government, among others,” said Thomas De Angelis, vice president of federal sales, GTRI. “The accurate real-time positioning that the Security Dome provides is proven to enhance facility and data security – two critical elements of any threat landscape.”

About Inpixon

Inpixon (NASDAQ: INPX) is a leader in Indoor Positioning and Data Analytics. Inpixon sensors are designed to find all accessible cellular, Wi-Fi, and Bluetooth devices anonymously. Paired with a high performance, data analytics platform this technology delivers visibility, security, and business intelligence on any commercial or government premises world-wide.
