Kane Biotech Announces Board Members

WINNIPEG, MANITOBA -- (Marketwired) -- 06/25/15 -- Kane Biotech Inc. (TSX VENTURE:KNE), a biotechnology company engaged in the development and commercialization of products that prevent and remove microbial biofilms is pleased to announce that the Company's Annual and Special Meeting of shareholders held on June 22, 2015 (the "Meeting"), the following individuals have been elected to the board of directors; Philip Renaud (Chairman), Dr. Arvind Joshi, Mark Nawacki, Dr. Sarah Prichard and Mark Ahrens-Townsend. Each Director is to serve for a term of one year or until their successors are elected or appointed.

About Kane Biotech Inc.

Kane Biotech is a biotechnology company engaged in the development of products to prevent and disperse biofilms. Biofilms develop when bacteria and other microorganisms form a protective matrix that acts as a shield against attack. When in a biofilm, bacteria become highly resistant to antibiotics, biocides, disinfectants, high temperatures and host immune responses. This resiliency contributes to human health problems such as recurrent urinary tract infections, medical device associated infections and tooth decay.

Kane Biotech uses patent protected technologies based on molecular mechanisms of biofilm formation/dispersal and methods for finding compounds that inhibit or disrupt biofilms. The Company has evidence that these technologies have potential to significantly improve the ability to prevent and/or destroy biofilms in several medical and industrial applications.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
