Hannon Armstrong Management to Present at 2018 J.P. Morgan Energy Conference

ANNAPOLIS, Md., June 13, 2018 /PRNewswire/ -- Hannon Armstrong Sustainable Infrastructure Capital, Inc. ("Hannon Armstrong," "we," "our" or the "Company") (NYSE: HASI), a capital and services provider focused on sustainable infrastructure markets that address climate change, today announced that Jeffrey Eckel, President & CEO, will present at the J.P. Morgan Energy Conference to be held at the Grand Hyatt New York in New York, NY on Wednesday, June 20, 2018 at 2:20pm ET.

Mr. Eckel's presentation will be broadcast live over the internet and can be accessed through the Company's website, www.hannonarmstrong.com. To listen to the presentation, please go to the website's "Investors" section at least 15 minutes prior to the start of the broadcast to register and download any necessary audio software. For those who are not able to listen to the live broadcast, a replay will be available shortly following the conference on Hannon Armstrong's website, and will be accessible for 90 days.

Management will hold one-on-one and small group meetings with investors. A copy of the presentation that the Company will use for upcoming investor meetings is available on its website under, "HASI Investor Relations Presentation – June 2018."

About Hannon Armstrong

Hannon Armstrong (NYSE: HASI) is a capital and services provider to the sustainable infrastructure markets, focused on reducing climate changing greenhouse gas emissions ("GHG" or carbon emissions) as well as mitigating the impact of, or increasing resiliency to, climate change. Our goal is to generate attractive returns for our stockholders by investing capital in assets that generate long-term, recurring and predictable cash flows or cost savings from proven technologies. We also provide services to the various partners and

counterparties in the markets where we invest. Our management team has extensive relevant industry knowledge and experience, dating back more than 30 years. With scientific consensus that climate warming trends are linked to human activities and resulting in various extreme weather events, we believe our firm is well positioned to generate better risk-adjusted returns by investing in the assets, and providing services to the firms, that reduce carbon emissions. Further, with increasing weather-related events affecting certain areas of our markets, we see similar investment and services opportunities in infrastructure assets that mitigate the impact of, and increase the resiliency to, these weather events and climate change. We are based in Annapolis, MD.
