Helios Technologies Launches Next-Generation Premium Rugged Display-Controller – The PowerView™ P70 – with Initial Customer

- ***First product introduction in new Pro Series of rugged display controllers with edge-to-edge full color touchscreen and industry leading sunlight-readability***
- ***High-performance all-weather durability ideal for powersports and heavy-duty industrial equipment***
- ***Multi-year award with customer in the electric vehicle end market***

SARASOTA, Fla.--(BUSINESS WIRE)-- Helios Technologies, Inc. (NYSE: HLIO) (“Helios” or the “Company”), a global leader in highly engineered motion control and electronic controls technology for diverse end markets, has unveiled the new PowerView™ P70, as part of the all-new Pro Series, Helios’ next-generation of premium rugged display-controllers. The new Pro Series is the first in a portfolio of products that will be tailored to meet different market requirements and is offered through Enovation Controls, part of Helios’ Electronics segment.

New PowerView™ Pro Series Powersports Market Example (Photo: Business Wire)

"We are pleased to introduce the PowerView™ P70, which represents a major step forward in rugged display-controller technology," said Josef Matosevic, the Company’s President and Chief Executive Officer. "With its combination of advanced features, premium display quality, and rugged durability, the PowerView™ P70 is the perfect solution for both powersports and industrial customers who demand the best. This is another great example of Helios leveraging a new platform across more than one end market to achieve a multiplier effect. We are also thrilled to announce an initial multi-million-dollar customer award for this product reinforcing the demand we have been hearing from customers.”

The PowerView™ P70 is the result of combining the best features from the highly sought after PV485 and PV700 products while retaining the ruggedness expected from an Enovation Controls’ display-controller. With a 7-inch edge-to-edge, all glass, full-color touchscreen format like the PV700, the all-new P70 sets the industry standard for sunlight-readability from its optically bonded 1000 Nit glove-friendly display. It also boasts the full I/O (input/output) complement of the PV485, making it a powerful and versatile device. The PowerView™ P70 is another innovation from our world class engineering design and validation capabilities that have been gained from decades of experience.

Ideal Control Displays for Powersports and Heavy Industrial Equipment Applications

The P70 will initially be available in two forms, a powersports model and an industrial model. It is packed with features such as an internal GPS receiver and 2.5 zone audio out, making it the best choice for powersports OEMs who demand top performance and functionality. 2.4GHz Wi-Fi will also be available in a future software release. For the industrial market, it offers the same core technology, rugged reliability and high-performance as the PV700 in a higher value format. Designed with all-weather durability, it features a rugged, IP67-rated housing that protects against water, dust, and shock, making it suitable for use in the harshest environments.

Core hardware features on the powersports model include Bluetooth, Wi-Fi, CAN, and GPS which are integrated directly into the P70 giving OEMs complete control. It will also allow for digital and analog inputs, low-side outputs, and a touchscreen designed for wet and dry use. The industrial model will have a subset of those features based on customer requirements.

Commercial availability for both the powersports and industrial models are targeted for early fourth quarter of 2023. Customers and prospects can view the new PowerView™ P70 at The Utility Expo September 26 - 28, 2023 in booth #3241.

About Enovation Controls

Enovation Controls is a fast growing and innovative manufacturer of electronic controls and displays for diverse markets. We are an international leader in fully tailored solutions for engines, engine-driven equipment, and specialty vehicles with a broad range of displays, controls, and instrumentation products. With an internationally diverse team of over 300 employees, we serve customers around the world with global sales, manufacturing, and engineering operations. Enovation Controls also partners directly with OEMs and supports a worldwide network of authorized distributors and system integrators. Visit us at www.enovationcontrols.com and follow us on LinkedIn.

About Helios Technologies

Helios Technologies is a global leader in highly engineered motion control and electronic controls technology for diverse end markets, including construction, material handling, agriculture, energy, recreational vehicles, marine and health and wellness. Helios sells its products to customers in over 90 countries around the world. Its strategy for growth is to be the leading provider in niche markets, with premier products and solutions through innovative product development and acquisition. The Company has paid a cash dividend to its shareholders every quarter since becoming a public company in 1997.
