About Viveve

Viveve Medical, Inc. is a medical technology company focused on women's intimate health. Viveve is committed to advancing new solutions to improve women's overall well-being and quality of life. The internationally patented Viveve® System incorporates CMRF technology to uniformly deliver volumetric heating while gently cooling surface tissue to generate neocollagenesis in a single in-office session. In the United States, the Viveve System is cleared by the Food and Drug Administration (FDA) for use in general surgical procedures for electrocoagulation and hemostasis. International regulatory approvals and clearances have been received for vaginal laxity and/or improvement in sexual function indications in more than 50 countries.

Viveve continues to advance its clinical development program in stress urinary incontinence (SUI) and is conducting a short-term feasibility study under an Investigational Testing Application approved by the Canadian Ministry of Health. The feasibility study is a single-blind, three-arm, three-month study to compare Viveve's CMRF treatment and a cryogen-only sham to an inert sham treatment in order to capture short-term safety and effectiveness data on use of the Viveve System for the improvement of SUI in women. Subject enrollment in the study was completed in March 2020. Results of the SUI feasibility study are targeted for readout in late summer of 2020. If positive, the feasibility study results could support our initiation of our pivotal PURSUIT trial pending FDA's approval of Viveve's Investigational Device Exemption application.
