Automotive  
and  
Transportation

Construction

Energy  
and Fuels

**SITE HISTORY**

**1983:** Production begins at the maleic anhydride unit, constructed by the Monsanto Corporation. This unit is located on the site of a chemical plant specializing in the production of nylon fiber and intermediate chemicals.

**1993:** Huntsman purchases the unit, operated by the Monsanto Corporation and then Solutia (spun off from Monsanto in 1997).

**2009:** Operational duties transfer to the Ascend Performance Materials group following their purchase of the nylon facility.

**Size of site**

Huntsman owns one unit that is situated inside the Ascend Performance Materials Pensacola facility. The Huntsman unit has a capacity of 109,000 metric tons of maleic anhydride annually.

**Distance from closest city or metro area**

The site is located approximately 17 miles from downtown Pensacola, Florida.
