LOS ANGELES--(BUSINESS WIRE)-- Rexford Industrial Realty, Inc. (the “Company” or “Rexford Industrial”) (NYSE:REXR), a real estate investment trust (“REIT”) that specializes in acquiring, owning and operating industrial properties located in Southern California infill markets, today announced financial results for the third quarter 2015.

- During the third quarter 2015, the Company acquired six industrial properties for an aggregate cost of \$57.8 million. Year to date, including two properties acquired after the end of the third quarter 2015, the Company has acquired 17 properties for an aggregate cost of \$196.5 million.

“We are pleased with the continued strong performance of our portfolio in the third quarter of 2015, as the results of our value-add property enhancements, strong re-leasing spreads and occupancy gains drove an 8.4% increase in Same Property Portfolio NOI,” stated Michael Frankel and Howard Schwimmer, Rexford Industrial’s Co-Chief Executive Officers. “Additionally, year-to-date we have acquired in excess of 1.5 million square feet of high-quality industrial property within our core infill submarkets, most of which were acquired in off-market or lightly-marketed transactions providing strong stabilized returns. Looking ahead, historically low levels of supply combined with the inability to deliver new, for-lease product amid increasing demand in our core Southern California infill markets, will continue to provide us the opportunity to drive rental rates and occupancy within our portfolio. Finally, our balance sheet remains well-capitalized to fund our acquisition pipeline as we work to execute on our operating and growth strategies which we believe will drive favorable shareholder returns and value creation.”

In October 2015, the Company acquired Midway, a two-building industrial property containing 373,744 square feet in Central San Diego for \$19.3 million, or approximately \$52 per square foot.

Balance Sheet:

In August 2015, the Company issued through a private placement \$100 million of 10-year senior guaranteed notes carrying a fixed annual interest rate of 4.29%. The net proceeds from the issuance of the notes were primarily used for the repayment of existing secured floating-rate indebtedness.

At September 30, 2015, the Company had \$335.9 million of outstanding debt, with an average interest rate of 3.068% and an average term-to-maturity of 5.4 years. As of September 30, 2015, \$110 million of the Company's floating-rate debt has been effectively fixed at 3.464% through the use of interest rate swaps. As a result of interest rate swaps and the issuance of the \$100 million notes, approximately \$218.4 million, or 65%, of the Company's outstanding debt was fixed-rate with an average interest rate of 3.93% and an average term-to-maturity of 6.7 years. The remaining \$117.5 million, or 35%, of the Company's outstanding debt was floating-rate, with an average interest rate of LIBOR+1.28% and an average term-to-maturity of 3.1 years.

As of September 30, 2015, the Company has entered into a forward interest rate swap that will effectively fix an additional \$50 million of the Company's floating-rate debt at 2.005% plus the applicable term loan facility margin from February 16, 2016 to December 14, 2018. If this interest rate swap was effective as of September 30, 2015, the Company's consolidated debt would be 80% fixed and 20% variable.

In August 2015, the Company received repayment of a \$13.71 million first mortgage loan, secured by an industrial property in San Juan Capistrano, California. The Company purchased the note for \$7.9 million in 2010, representing a 46% discount to par value. The loan, which carried an interest rate of 6% and was due in May 2017, was repaid at par. Proceeds from the loan repayment were used to fund the acquisition of 10701-10719 Norwalk Boulevard, and to reduce the balance outstanding on the Company's line of credit.

The Company is increasing its full year 2015 guidance range for Company share of Recurring FFO to a range of \$0.79 to \$0.81 per diluted share of common stock. Definitions / Discussion of Non-GAAP Financial Measures:

Funds from Operations (FFO): We calculate FFO before non-controlling interest in accordance with the standards established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures. Management uses FFO as a supplemental performance measure because, in excluding real estate related depreciation and amortization, gains and losses from property dispositions, other than temporary impairments of unconsolidated real estate entities, and impairment on our investment in real estate, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized measure of performance used by other REITs, FFO may be used by investors as a basis to compare our operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. Other equity REITs may not calculate or interpret FFO in accordance with the NAREIT definition as we do, and, accordingly, our FFO may not be comparable to such other REITs' FFO. FFO should not be used as a measure of our liquidity, and is not indicative of funds available for our cash needs, including our ability to pay dividends. A reconciliation of FFO to net income, the nearest GAAP equivalent, is set forth below.

Recurring Funds from Operations (Recurring FFO): We calculate Recurring FFO by adjusting FFO to exclude the effect of non-recurring expenses and acquisition expenses. A reconciliation of FFO to Recurring FFO is set forth below.

Net Operating Income (NOI): Includes the revenue and expense directly attributable to our real estate properties calculated in accordance with GAAP. Calculated as total revenue from real estate operations including i) rental revenues ii) tenant reimbursements, and iii) other income less property expenses (before interest expense, depreciation and amortization). We use NOI as a supplemental performance measure because, in excluding real estate depreciation and amortization expense and gains (or losses) from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that NOI will be useful to investors as a basis to compare our operating performance with that of other REITs. However, because NOI excludes depreciation and amortization expense and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties (all of which have real economic effect and could materially impact our results from operations), the utility of NOI as a measure of our performance is limited. Other equity REITs may not calculate NOI in a similar manner and, accordingly, our NOI may not be comparable to such other REITs' NOI. Accordingly, NOI should be considered only as a supplement to net income as a measure of our performance. NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs.

NOI should not be used as a substitute for cash flow from operating activities in accordance with GAAP. We use NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of NOI for our Same Property Portfolio, as well as a reconciliation of NOI for our Same Property Portfolio to net income for our Same Property Portfolio, is set forth below.

Cash NOI: Cash NOI is a non-GAAP measure, which we calculate by adding or subtracting from NOI i) fair value lease revenue and ii) straight-line rent adjustment. We use Cash NOI, together with NOI, as a supplemental performance measure. Cash NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. Cash NOI should not be used as a substitute for cash flow from operating activities

computed in accordance with GAAP. We use Cash NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of Cash NOI for our Same Property Portfolio, as well as a reconciliation of Cash NOI for our Same Property Portfolio to net income for our Same Property Portfolio, is set forth below.

Same Property Portfolio: Our Same Property Portfolio is a subset of our consolidated portfolio and includes properties that were wholly-owned by us as of January 1, 2014 and still owned by us as of September 30, 2015. Therefore, we excluded from our Same Properties Portfolio any properties that were acquired or sold during the period from January 1, 2014 through September 30, 2015. The Company's computation of same property performance may not be comparable to other REITs.

Stabilized Same Property Portfolio: Our Stabilized Same Property Portfolio represents the properties included in our Same Property Portfolio, adjusted to exclude spaces that were under repositioning. During the quarter ended September 30, 2015, spaces aggregating 72,000 square feet were under repositioning.
