Operational and Financial Highlights:

- Quarterly NOI for our Same Property Portfolio increased 18.4% and Cash NOI for our Same Property Portfolio increased 20.8% compared to the second quarter of 2012
- Same Property Portfolio occupancy increased 10.6 percentage points to 88.5% compared to the second quarter of 2012

- Subsequent to the end of the quarter, acquired two properties, totaling 124,000 square feet, for approximately \$14.0 million

“We are extremely pleased with the performance of our business in the second quarter,” commented Michael Frankel, Rexford Industrial’s Co-Chief Executive Officer. “Our Same Property Portfolio generated a 12% increase in revenue and an 18% increase in NOI. Our infill Southern California industrial portfolio continues to see positive absorption, with leasing economics improving as the regional economy strengthens. Lower concessions and rebounding rents resulted in positive renewal spreads. On the external growth front, Rexford Industrial is actively pursuing acquisitions and since the start of the second quarter, we have acquired six industrial properties for a total of \$87.8 million. With the completion of our initial public offering in July, we are well-positioned to continue to execute on our external growth strategy, capitalizing on our deal sourcing capabilities and deep market relationships.”

Definitions / Discussion of Non-GAAP Financial Measures:

NOI: Includes the revenue and expense directly attributable to our real estate properties calculated in accordance with GAAP. Calculated as total revenue from real estate operations including i) rental revenues ii) tenant reimbursements, and iii) other income less property expenses and other property expenses (before interest expense, depreciation and amortization). We use NOI as a supplemental performance measure because, in excluding real estate depreciation and amortization expense and gains (or losses) from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that NOI will be useful to investors as a basis to compare our operating performance with that of other REITs. However, because NOI excludes depreciation and amortization expense and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties (all of which have real economic effect and could materially impact our results from operations), the utility of NOI as a measure of our performance is limited. Other equity REITs may not calculate NOI in a similar manner and, accordingly, our NOI may not be comparable to such other REITs' NOI. Accordingly,

NOI should be considered only as a supplement to net income as a measure of our performance. NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. NOI should not be used as a substitute for cash flow from operating activities in accordance with GAAP. We use NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of NOI for our Same Property Portfolio, as well as a reconciliation of NOI for our Same Property Portfolio to net income for our Same Property Portfolio, is set forth below.

Cash NOI: Cash basis NOI is a non-GAAP measure, which we calculate by adding or subtracting from NOI i) fair value lease revenue and ii) straight-line rent adjustment. We use Cash NOI, together with NOI, as a supplemental performance measure. Cash NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. Cash NOI should not be used as a substitute for cash flow from operating activities computed in accordance with GAAP. We use Cash NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of Cash NOI for our Same Property Portfolio, as well as a reconciliation of Cash NOI for our Same Property Portfolio to net income for our Same Property Portfolio, is set forth below.

Same Property Portfolio: Determined independently for each period presented. Comparable properties must have been owned for the entire current and prior periods presented. The Company's computation of same property performance may not be comparable to other real estate companies.
