The Company has included in a supplemental information package the detailed results and operating statistics that reflect the activities of the Company for the three months ended June 30, 2016. See below for information regarding the supplemental information package.

### **Transaction Activity:**

In the second quarter 2016, the Company acquired 11 industrial properties, for an aggregate purchase price of \$206.2 million, as detailed below. Additionally, the Company sold three industrial properties for \$21.7 million.

In April 2016, the Company acquired a private REIT comprised of a portfolio of nine industrial properties for a total purchase price of approximately \$191.0 million, or approximately \$125 per square foot, exclusive of closing costs. The portfolio consists of nine properties located in four of the Company's core infill Southern California industrial markets, including Orange County, Los Angeles-San Gabriel Valley, Inland Empire West, and Central San Diego, totaling approximately 1.53 million rentable square feet.

In May 2016, the Company acquired 10750-10826 Lower Azusa Road, a four-building industrial complex containing 79,050 square feet in Los Angeles' San Gabriel Valley submarket for \$7.7 million, or approximately \$97 per square foot.

In June 2016, the Company acquired 525 Park Avenue, a two-tenant industrial building containing 63,403 square feet in Los Angeles' San Fernando Valley submarket for \$7.6 million, or approximately \$119 per square foot.

In May 2016, the Company sold 6010 N. Paramount Boulevard, a 16,534 square foot building in Los Angeles' South Bay submarket for \$2.5 million, or approximately \$150 per square foot. The sale proceeds were used in a tax deferred exchange contributed towards the Lower Azusa Road acquisition.

In May 2016, the Company also sold 1840 Dana Street, an industrial building containing 13,497 square feet in the Greater San Fernando Valley submarket, for \$4.25 million, or approximately \$315 per square foot.

In June 2016, the Company sold 12910 Mulberry Drive, an industrial building containing 153,080 square feet in Los Angeles' Mid Counties submarket, for \$15.0 million, or approximately \$98 per square foot. Proceeds from the Mulberry Drive and Dana Street dispositions were used in a tax deferred exchange contributed towards the Mission Oaks acquisition, which closed in July 2016.

### **Subsequent Events:**

In July 2016, the Company acquired the remaining 85% joint venture interest in 3233 Mission Oaks Boulevard, a two-building industrial property containing 457,693 square feet in the Ventura County submarket for \$21.8 million, based on 85% of the total purchase price of \$25.7 million, or approximately \$56 per square foot.

### **Balance Sheet:**

In April 2016, the Company issued 10.35 million shares of its common stock at \$17.65 per share, for net proceeds of approximately \$174.4 million after deducting the underwriting discount and offering expenses.

In April 2016, the Company exercised the \$100 million accordion on the seven-year unsecured term loan facility. After the expansion into the accordion, the total term loan facility balance is \$225 million. The \$225 million term loan facility matures on January 14, 2023 and bears interest at LIBOR plus an applicable Eurodollar rate margin that will range from 1.50% to 2.25% per annum depending on the Company's leverage ratio. The proceeds from the equity offering and the \$100 million accordion expansion were used to fund the \$191 million portfolio acquisition completed in April and to pay down the outstanding balance on the revolving credit facility.

In May 2016, the Company executed an interest swap that will effectively fix the \$100 million accordion at 1.406% plus an applicable Eurodollar rate margin from August 14, 2018 to January 14, 2022. In the prior quarter, the Company executed an interest rate swap to fix the initial \$125 million term loan facility at 1.349% plus an applicable Eurodollar rate margin from February 14, 2018 to January 14, 2022.

At June 30, 2016, the Company had \$503 million of outstanding debt, with an average interest rate of 3.059% and an average term-to-maturity of 5.8 years. At June 30, 2016, \$160 million of the Company's floating-rate debt has been effectively fixed at 3.461% through the use of interest rate swaps. As a result of interest rate swaps and the issuance of \$100 million of fixed-rate notes last year, approximately \$278 million, or 55%, of the Company's outstanding debt was fixed-rate with an average interest rate of 3.86% and an average term-to-maturity of 5.3 years. The remaining \$225 million, or 45%, of the Company's outstanding debt was floating-rate, with an average interest rate of LIBOR + 1.60% and an average term-to-maturity of 6.5 years. If the two interest rate swaps noted above were effective as of June 30, 2016, 100% of the Company's debt would be effectively fixed.

### **Guidance**

The Company is maintaining its full year 2016 guidance range for Company share of Core FFO to a range of \$0.85 to \$0.88 per diluted share of common stock. This Core FFO guidance refers only to the Company's in-place portfolio as of August 3, 2016 and does not include any assumptions for acquisitions, dispositions or balance sheet activities that may or may not occur later during the year. Full year guidance

otherwise remains unchanged and assumes the following: year-end Same Property Portfolio occupancy within a range of 94% to 95%, Same Property Portfolio NOI growth for the year of 5% to 7% and general & administrative expenses of \$16.5 to \$17.0 million.

The Company does not provide a reconciliation for its guidance range of Core FFO per diluted share to net income attributable to common stockholders per diluted share, the most directly comparable forward-looking GAAP financial measure, because it is unable to provide a meaningful or accurate estimation of reconciling items and the information is not available without unreasonable effort. This is due to the inherent difficulty of forecasting the timing and/or amount of various items that would impact net income available to common stockholders per diluted share, including, for example, acquisition costs, gains on sales of depreciable real estate and other items that have not yet occurred and are out of the Company's control. For the same reasons, the Company is unable to address the probable significance of the unavailable information and believes that providing a reconciliation for its guidance range of Core FFO per diluted share would imply a degree of precision as to its forward-looking net income available to common stockholders per diluted share that would be confusing or misleading to investors.

#### **Dividend:**

On August 1, 2016, the Board of Directors declared a dividend of \$0.135 per share for the third quarter of 2016, payable in cash on October 17, 2016, to stockholders and unit holders of record on September 30, 2016.

#### **Definitions / Discussion of Non-GAAP Financial Measures:**

**Funds from Operations (FFO):** We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, impairment losses, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures. Management uses FFO as a supplemental performance measure because, in excluding real estate related depreciation and amortization, gains and losses from property dispositions, other than temporary impairments of unconsolidated real estate entities, and impairment on our investment in real estate, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized measure of performance used by other REITs, FFO may be used by investors as a basis to compare our operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. Other equity REITs may not calculate or interpret FFO in accordance with the NAREIT definition as we do, and, accordingly, our FFO may not be comparable to such other REITs' FFO. FFO should not be used as a measure of our liquidity, and is not indicative of funds available for our cash needs, including our ability to pay dividends. FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of net income, the nearest GAAP equivalent, to FFO is set forth below.

**Core Funds from Operations (Core FFO):** We calculate Core FFO by adjusting FFO to exclude the impact of certain items that we do not consider reflective of our core revenue or expense streams. These adjustments consist of acquisition expenses and legal expenses or reimbursements related to prior litigation. For more information on prior litigation, see Item 3. Legal Proceedings in our 2014 Annual Report on Form 10-K. Management believes that Core FFO is a useful supplemental measure as it provides a more meaningful and consistent comparison of operating performance and allows investors to more easily compare the Company's operating results. Because certain of

these adjustments have a real economic impact on our financial condition and results from operations, the utility of Core FFO as a measure of our performance is limited. Other REITs may not calculate Core FFO in a consistent manner. Accordingly, our Core FFO may not be comparable to other REITs's Core FFO. Core FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of FFO to Core FFO is set forth below.

**Net Operating Income (NOI):** Includes the revenue and expense directly attributable to our real estate properties calculated in accordance with GAAP. Calculated as total revenue from real estate operations including i) rental revenues ii) tenant reimbursements, and iii) other income less property expenses (before interest expense, depreciation and amortization). We use NOI as a supplemental performance measure because, in excluding real estate depreciation and amortization expense and gains (or losses) from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that NOI will be useful to investors as a basis to compare our operating performance with that of other REITs. However, because NOI excludes depreciation and amortization expense and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties (all of which have real economic effect and could materially impact our results from operations), the utility of NOI as a measure of our performance is limited. Other equity REITs may not calculate NOI in a similar manner and, accordingly, our NOI may not be comparable to such other REITs' NOI. Accordingly, NOI should be considered only as a supplement to net income as a measure of our performance. NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs.

NOI should not be used as a substitute for cash flow from operating activities in accordance with GAAP. We use NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of NOI for our Same Property Portfolio, as well as a reconciliation of NOI for our Same Property Portfolio to net income, is set forth below.

**Cash NOI:** Cash NOI is a non-GAAP measure, which we calculate by adding or subtracting from NOI i) fair value lease revenue and ii) straight-line rent adjustments. We use Cash NOI, together with NOI, as a supplemental performance measure. Cash NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. Cash NOI should not be used as a substitute for cash flow from operating activities computed in accordance with GAAP. We use Cash NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of Cash NOI for our Same Property Portfolio, as well as a reconciliation of Cash NOI for our Same Property Portfolio to net income, is set forth below.

**Same Property Portfolio:** Our Same Property Portfolio is a subset of our consolidated portfolio and includes properties that were wholly-owned by us as of January 1, 2015 and still owned by us as of June 30, 2016. Therefore, we excluded from our Same Properties Portfolio any properties that were acquired or sold during the period from January 1, 2015 through June 30, 2016. The Company's computation of same property performance may not be comparable to other REITs.

**Stabilized Same Property Portfolio:** Our Stabilized Same Property Portfolio represents the properties included in our Same Property Portfolio, adjusted to exclude space at properties that were in various stages of repositioning or lease-up. As of June 30, 2016, space aggregating 318,464 rentable square feet at six of our Same Property Portfolio properties were in various stages of repositioning or lease-up.
