"Rexford's strong first quarter results, which culminated with a 42% increase in Core FFO and a 17.4% increase in Core FFO per share, driven in part by a 9.3% increase in Same Property NOI, are indicative of the strength of the value-driven Rexford platform, our focused business model and extensive market opportunity," stated Michael Frankel and Howard Schwimmer, Co-Chief Executive Officers of the Company. "During the first quarter, we achieved impressive GAAP and cash releasing spreads of 25.3% and 14.9%, respectively, as we capitalized on the favorable fundamentals within the infill Southern California industrial market. We continue to see an extreme scarcity of available space and a supply-demand imbalance into the foreseeable future, as more product is converted to other uses than can be delivered, amidst increasing demand from the dramatic growth in e-commerce, among other landlord-favorable factors."

- Year-end Same Property Portfolio occupancy within a range of 95.0% to 97.0%

The Core FFO guidance refers only to the Company's in-place portfolio as of May 1, 2018, and does not include any assumptions for acquisitions, dispositions or balance sheet activities that may or may not occur later during the year. The Company's in-place portfolio as of May 1, 2018, reflects the acquisition of five properties totaling 372,691 rentable square feet and the disposition of one property containing 11,808 rentable square feet that occurred subsequent to March 31, 2018. A number of factors could impact the Company's ability to deliver results in line with its guidance, including, but not limited to, interest rates, the economy, the supply and demand of industrial real estate, the availability and terms of financing to the Company or to potential acquirers of real estate and the timing and yields for divestment and investment. There can be no assurance that the Company can achieve such results.

Definitions / Discussion of Non-GAAP Financial Measures:

Funds from Operations (FFO): We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, impairment losses, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures. Management uses FFO as a supplemental performance measure because, in excluding real estate related depreciation and amortization, gains and losses from property dispositions, other than temporary impairments of unconsolidated real estate entities, and impairment on our investment in real estate, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized measure of performance used by other REITs, FFO may be used by investors as a basis to compare our operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. Other equity REITs may not calculate or interpret FFO in accordance with the NAREIT definition as we do, and, accordingly, our FFO may not be comparable to such other REITs' FFO. FFO should not be used as a measure of our liquidity, and is not indicative of funds available for our cash needs, including our ability to pay dividends. FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of net income, the nearest GAAP equivalent, to FFO is set forth below.

Core Funds from Operations (Core FFO): We calculate Core FFO by adjusting FFO to exclude the impact of certain items that we do not consider reflective of our core revenue or expense streams. These adjustments consist of acquisition expenses. Management believes that Core FFO is a useful supplemental measure as it provides a more meaningful and consistent comparison of operating performance and allows investors to more easily compare the Company's operating results. Because certain of these adjustments have a real economic impact on our financial condition and results from operations, the utility of Core FFO as a measure of our performance is limited. Other REITs may not calculate Core FFO in a consistent manner. Accordingly, our Core FFO may not be comparable to other REITs' Core FFO. Core FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of FFO to Core FFO is set forth below.

Reconciliation of Net Income Attributable to Common Stockholders per Diluted Share Guidance to Company share of Core FFO per Diluted Share Guidance: The following is a reconciliation of the Company's guidance range of net income attributable to common stockholders per diluted share, the most directly comparable forward-looking GAAP financial measure, to Company share of Core FFO per diluted share.

2018 Estimate	
Low	High

Net income attributable to common stockholders	\$ 0.22	\$ 0.25
Company share of depreciation and amortization	\$ 0.92	\$ 0.92
Company share of gains on sale of real estate	<u>\$ (0.12)</u>	<u>\$ (0.12)</u>
Company share of Core FFO	<u>\$ 1.02</u>	<u>\$ 1.05</u>

Net Operating Income (NOI): NOI is a non-GAAP measure, which includes the revenue and expense directly attributable to our real estate properties. NOI is calculated as total revenue from real estate operations including i) rental income, ii) tenant reimbursements and iii) other income less property expenses (before interest expense, depreciation and amortization). We use NOI as a supplemental performance measure because, in excluding real estate depreciation and amortization expense and gains (or losses) from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that NOI will be useful to investors as a basis to compare our operating performance with that of other REITs. However, because NOI excludes depreciation and amortization expense and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties (all of which have a real economic effect and could materially impact our results from operations), the utility of NOI as a measure of our performance is limited. Other equity REITs may not calculate NOI in a similar manner and, accordingly, our NOI may not be comparable to such other REITs' NOI. Accordingly, NOI should be considered only as a supplement to net income as a measure of our performance. NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs.

NOI should not be used as a substitute for cash flow from operating activities in accordance with GAAP. We use NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of NOI for our Same Property Portfolio, as well as a reconciliation of net income to NOI for our Same Property Portfolio, is set forth below.

Cash NOI: Cash NOI is a non-GAAP measure, which we calculate by adding or subtracting from NOI i) fair value lease revenue and ii) straight-line rent adjustments. We use Cash NOI, together with NOI, as a supplemental performance measure. Cash NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. Cash NOI should not be used as a substitute for cash flow from operating activities computed in accordance with GAAP. We use Cash NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Same Property Portfolio. A calculation of Cash NOI for our Same Property Portfolio, as well as a reconciliation of net income to Cash NOI for our Same Property Portfolio, is set forth below.

Same Property Portfolio: Our Same Property Portfolio is a subset of our consolidated portfolio and includes properties that were wholly-owned by us as of January 1, 2017, and still owned by us as of March 31, 2018. Therefore, we excluded from our Same Properties Portfolio any properties that were acquired or sold during the period from January 1, 2017 through March 31, 2018. The Company's computation of same property performance may not be comparable to other REITs.

Stabilized Same Property Portfolio: Our Stabilized Same Property Portfolio represents the properties included in our Same Property Portfolio, adjusted to exclude the properties listed in the tables below that were under repositioning/lease-up during comparable years.

Stabilized Same Property Portfolio occupancy/leasing statistics, excludes vacant/unleased repositioning space at each of these properties as of the end of each reporting period. Stabilized Same Property Portfolio NOI, excludes the NOI for the entire property for all comparable periods.

Our Stabilized Same Property Portfolio excludes the following Same Property Portfolio properties that were in various stages of repositioning or lease-up during the year ended December 31, 2017 and the three months ended March 31, 2018:

12131 Western Avenue	301-445 Figueroa Street
14742-14750 Nelson Avenue	3233 Mission Oaks Boulevard
1601 Alton Parkway	3880 Valley Boulevard
18118-18120 Broadway Street	679-691 South Anderson Street
228th Street	9615 Norwalk Boulevard
2700-2722 Fairview Street	

As of March 31, 2018, the difference between our Same Property Portfolio and our Stabilized Same Property Portfolio is 376,385 rentable square feet of space at five of our properties that were classified as repositioning or lease-up. As of March 31, 2017, the difference between our Same Property Portfolio and our Stabilized Same Property Portfolio is space aggregating 534,924 rentable square feet at nine of our properties that were in various stages of repositioning or lease-up.

Properties and Space Under Repositioning: Typically defined as properties or units where a significant amount of space is held vacant in order to implement capital improvements that improve the functionality (not including basic refurbishments, i.e., paint and carpet), cash flow and value of that space. We define a significant amount of space in a building as the lower of (i) 20,000 square feet of space or (ii) 50% of a building's square footage. Typically, we would include properties or space where the repositioning and lease-up time frame is estimated to be greater than six months. A repositioning is considered complete once the investment is fully or nearly fully deployed and the property is marketable for leasing. We consider a repositioning property to be stabilized at the earlier of the following: (i) upon reaching 90% occupancy or (ii) one year from the date of completion of repositioning construction work.
