Airgain® Announces 5G Series of OMNIMAX® Next Dipole Antennas for M2M and IoT Applications

Airgain extends product portfolio to provide high performance connectivity for the next generation of 5G NR sub-6GHz IoT and M2M applications

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc.](#) (NASDAQ: AIRG), a leading provider of advanced antenna technologies used to enable high performance wireless networking across a broad range of devices and markets, including consumer, enterprise, and automotive, today announced the release of its OMNIMAX Next Dipole antennas, the latest addition to Airgain's 5G product portfolio designed to deliver ultra-wideband connectivity for 5G NR sub-6GHz IoT and M2M applications.

The OMNIMAX Next Dipole series includes 5G NR sub-6GHz products for low profile and shock resistant outdoor applications, including "salt shaker" style antennas, indoor dipole "paddle" antennas, and outdoor "candlestick" dipole antennas. Each product is designed to blend into the environment, with flexible mounting options while providing ultra-wideband connectivity for virtually any indoor or outdoor cellular module, modem, or gateway. The 5G ready OMNIMAX Next Dipole series provides future-proof performance, with backward compatibility from 5G to 4G and 3G global frequency bands.

"Supporting sub-6GHz 5G, particularly the lower bands approaching 600MHz, is challenging for the form factors of these products," said Kevin Thill, Airgain's Senior Vice President of Engineering. "These antennas achieve excellent broadband performance without compromising the form factor, while outperforming competing solutions that we have seen in the market today. These antennas feature a unique and patent pending Coplanar Waveguide feed, which is key to enabling the ultra-wideband performance in the given form factors. We are excited to offer the expansion of our product portfolio of 5G ready antennas designed to accommodate wider bandwidth requirements demanded by 5G. The OMNIMAX Next Dipole series provides a cost-effective solution while delivering dependable quality."

Building on Airgain's antenna design expertise of [CENTURION™ Next](#), the industry's first 9-in-1 5G and Wi-Fi 6 fleet antenna, the OMNIMAX Next Dipole series includes 617 MHz to 6 GHz wideband cellular 5G support. [OMNIMAX Indoor Dipole Next](#), [OMNIMAX Outdoor Dipole Next](#), and [M2M SN Next](#) are available through our trusted channel partners or direct at 1-855-AIRGAIN.

About Airgain, Inc.

Airgain is a leading provider of advanced antenna technologies used to enable high performance wireless networking across a broad range of devices and markets, including

consumer, enterprise, and automotive. Combining design-led thinking with testing and development, Airgain works in partnership with the entire ecosystem, including carriers, chipset suppliers, OEMs, and ODMs. Airgain's antennas are deployed in carrier, fleet, enterprise, residential, private, government, and public safety wireless networks and systems, including set-top boxes, access points, routers, modems, gateways, media adapters, portables, digital televisions, sensors, fleet, and asset tracking devices. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. For more information, visit airgain.com, or follow us on [LinkedIn](#) and [Twitter](#).

Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the expected performance of Airgain's OMNIMAX Next Dipole antenna products, including connectivity, mounting flexibility, and their shock and environmental resistance. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our products is developing and may not develop as we expect; risks associated with the performance of our products; our products are subject to intense competition, and competitive pressures from existing and new companies may harm our business, sales, growth rates and market share; the COVID-19 pandemic may continue to disrupt and otherwise adversely affect our operations and those of our suppliers, partners, distributors and ultimate end customers, and the overall supply chain that our antennas are used in, as well as adversely affecting the general U.S. and global economic conditions and financial markets, and, ultimately, our sales and operating results; risks associated with the first of its kind product introduction into the newly licensed Band 14 frequencies and associated uncertainty of regulatory compliance in a new product category; risks associated with quality and timing in manufacturing our products and our reliance on third-party manufacturers; if we cannot protect our intellectual property rights, our competitive position could be harmed or we could incur significant expenses to enforce our rights; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission, including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
