Ceapro Receives Certification From ECOCERT

EDMONTON, ALBERTA -- (MARKET WIRE) -- 11/09/10 -- Ceapro Inc. (TSX VENTURE: CZO) is pleased to announce that it has received ECOCERT certification for its new all natural line of products. The certifications include Ceapro's avenanthramide and oat oil products as well as newly formulated versions beta glucan, oat peptides, and lupin peptides.

"This is an important milestone as part of Ceapro's plan to grow its sales volume", said David Fielder, Chief Scientific Officer at Ceapro. "We have developed these products and obtained these certifications based on feedback from customers and potential customers. This will allow Ceapro products to be evaluated by customers who require all natural certification in their formulations as well as provide existing customers the option to move to all natural ingredients in the future in accordance with market trends in the personal care industry", added Mr. Fielder.

About Ceapro Inc.

Ceapro Inc. is a Canadian growth-stage biotechnology company. Primary business activities relate to the development and commercialization of active ingredients for personal care and cosmetic industries using proprietary technology and natural, renewable resources. The commercial line of natural active ingredients include beta glucan, avenanthramides (colloidal oat extract), oat powder, oat oil, oat peptides, and lupin peptides.
