- (1) The effective interest rate includes the impact of discounts and premiums and interest rate swap agreements, as applicable. See page 18 for additional details.
- (2) Includes applicable extensions available at our option.
- (3) The Company has unsecured lines of credit that provide for borrowings of up to \$600.0 million. The unsecured lines of credit include a \$20.0 million liquidity line and a \$580.0 million syndicated line. A 15 basis point facility fee is due annually on the entire committed amount of each facility. The syndicated line may be increased up to \$1.2 billion through an accordion feature in certain circumstances.
- (4) In October 2018, we amended and restated our unsecured term loan, increasing the size of the loan from \$325.0 million to \$350.0 million, extending maturity from April 2021 to April 2024, and reducing the interest rate spread over LIBOR from 0.95% to 0.90%. The \$25.0 million of proceeds were used to pay down the balances outstanding under our unsecured lines of credit.
- (5) In June 2018, the joint venture closed on a \$100.0 million mortgage loan with a fixed interest rate of 4.3% and a maturity date of July 2028. The proceeds from the loan were used to pay off the \$90.0 million mortgage loan with an interest rate of LIBOR + 1.45% that had an original maturity date of November 2018. The joint venture distributed the incremental net loan proceeds of \$9.3 million equally to the partners.
- (6) In December 2018, the National Harbor joint venture closed on a \$95.0 million mortgage loan with a fixed interest rate of approximately 4.6% and a maturity date of January 2030. The proceeds from the loan were used to pay off the \$87.0 million construction loan with an interest rate of LIBOR + 1.65%, which had an original maturity date of November 2019. The joint venture distributed the incremental net loan proceeds of \$7.4 million equally to the partners.

NON-GAAP SUPPLEMENTAL MEASURES

Funds From Operations

Funds From Operations ("FFO") is a widely used measure of the operating performance for real estate companies that supplements net income (loss) determined in accordance with GAAP. We determine FFO based on the definition set forth by the National Association of Real Estate Investment Trusts ("NAREIT"), of which we are a member. FFO represents net income (loss) (computed in accordance with GAAP) before extraordinary items and gains (losses) on sale or disposal of depreciable operating properties, plus depreciation and amortization of real estate assets, impairment charges on depreciable real estate of consolidated real estate and after adjustments for unconsolidated partnerships and joint ventures, including depreciation and amortization, and impairment losses on investments in unconsolidated joint ventures driven by a measurable decrease in the fair value of depreciable real estate held by the unconsolidated joint ventures.

FFO is intended to exclude historical cost depreciation of real estate as required by GAAP which assumes that the value of real estate assets diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. Because FFO excludes depreciation and amortization of real estate assets, gains and losses from property dispositions and extraordinary items, it provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities and interest costs, providing perspective not immediately apparent from net income.

We present FFO because we consider it an important supplemental measure of our operating performance. In addition, a portion of cash bonus compensation to certain members of management is based on our FFO or Adjusted Funds From Operations ("AFFO"), which is described in the section below. We believe it is useful for investors to have enhanced transparency into how we evaluate our performance and that of our management. In addition, FFO is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. FFO is also widely used by us and others in our industry to evaluate and price potential acquisition candidates. NAREIT has encouraged its member companies to report their FFO as a supplemental, industry-wide standard measure of REIT operating performance.

FFO has significant limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

- FFO does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- FFO does not reflect changes in, or cash requirements for, our working capital needs;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and FFO does not reflect any cash requirements for such replacements;
- FFO, which includes discontinued operations, may not be indicative of our ongoing operations; and
- Other companies in our industry may calculate FFO differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, FFO should not be considered as a measure of discretionary cash available to us to invest in the growth of our business or our dividend paying capacity. We compensate for these limitations by relying primarily on our GAAP results and using FFO only as a supplemental measure.

Adjusted Funds From Operations

We present AFFO as a supplemental measure of our performance. We define AFFO as FFO further adjusted to eliminate the impact of certain items that we do not consider indicative of our ongoing operating performance. These further adjustments are itemized in the table below. You are encouraged to evaluate these adjustments and the reasons we consider them appropriate for supplemental analysis. In evaluating AFFO you should be aware that in the future we may incur expenses that are the same as or similar to some of the adjustments in this presentation. Our presentation of AFFO should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.

We present AFFO because we believe it assists investors and analysts in comparing our performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance. In addition, we believe it is useful for investors to have enhanced transparency into how we evaluate management's performance and the effectiveness of our business strategies. We use AFFO when certain material, unplanned transactions occur as a factor in evaluating management's performance and to evaluate the effectiveness of our business strategies, and may use AFFO when determining incentive compensation.

AFFO has limitations as an analytical tool. Some of these limitations are:

- AFFO does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- AFFO does not reflect changes in, or cash requirements for, our working capital needs;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and AFFO does not reflect any cash requirements for such replacements;
- AFFO does not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of our ongoing operations; and
- Other companies in our industry may calculate AFFO differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, AFFO should not be considered in isolation or as a substitute for performance measures calculated in accordance with GAAP. We compensate for these limitations by relying primarily on our GAAP results and using AFFO only as a supplemental measure.

Funds Available for Distribution

Funds Available for Distribution ("FAD") is a non-GAAP financial measure that we define as FFO, excluding corporate depreciation, amortization of finance costs, amortization of net debt discount (premium), amortization of share-based compensation, straight line rent amounts, market rent amounts, less 2nd generation tenant allowances, capital improvement expenditures, and our share of the items listed above for our unconsolidated joint ventures. Investors, analysts and the Company utilize FAD as an indicator of common dividend potential. The FAD payout ratio, which represents regular distributions to common shareholders and unit holders of the Operating Partnership expressed as a percentage of FAD, facilitates the comparison of dividend coverage between REITs.

We believe that net income (loss) is the most directly comparable GAAP financial measure to FAD. FAD does not represent cash generated from operating activities in accordance with GAAP and should not be considered as an alternative to net income (loss) as an indication of our performance or to cash flows as a measure of liquidity or our ability to make distributions. Other companies in our industry may calculate FAD differently than we do, limiting its usefulness as a comparative measure.

Portfolio Net Operating Income and Same Center Net Operating Income

We present portfolio net operating income ("Portfolio NOI") and same center net operating income ("Same Center NOI") as supplemental measures of our operating performance. Portfolio NOI represents our property level net operating income which is defined as total operating revenues less property operating expenses and excludes termination fees and non-cash adjustments including straight-line rent, net above and below market rent amortization and gains or losses on the sale of outparcels recognized during the periods presented. We define Same Center NOI as Portfolio NOI for the properties that were operational for the entire portion of both comparable reporting periods and which were not acquired, or subject to a material expansion or non-recurring event, such as a natural disaster, during the comparable reporting periods.

We believe Portfolio NOI and Same Center NOI are non-GAAP metrics used by industry analysts, investors and management to measure the operating performance of our properties because they provide performance measures directly related to the revenues and expenses involved in owning and operating real estate assets and provide a perspective not immediately apparent from net income, FFO or AFFO. Because Same Center NOI excludes properties developed, redeveloped, acquired and sold; as well as non-cash adjustments, gains or losses on the sale of outparcels and termination rents; it highlights operating trends such as occupancy levels, rental rates and operating costs on properties that were operational for both comparable periods. Other REITs may use different methodologies for calculating Portfolio NOI and Same Center NOI, and accordingly, our Portfolio NOI and Same Center NOI may not be comparable to other REITs.

Portfolio NOI and Same Center NOI should not be considered alternatives to net income (loss) or as an indicator of our financial performance since they do not reflect the entire operations of our portfolio, nor do they reflect the impact of general and administrative expenses, acquisition-related expenses, interest expense, depreciation and amortization costs, other non-property income and losses, the level of capital expenditures and leasing costs necessary to maintain the operating performance of our properties, or trends in development and construction activities which are significant economic costs and activities that could materially impact our results from operations. Because of these limitations, Portfolio NOI and Same Center NOI should not be viewed in isolation or as a substitute for performance measures calculated in accordance with GAAP. We compensate for these limitations by relying primarily on our GAAP results and using Portfolio NOI and Same Center NOI only as supplemental measures.

Non-GAAP Pro Rata Balance Sheet and Income Statement Information

The pro rata balance sheet and pro rata income statement information is not, and is not intended to be, a presentation in accordance with GAAP. The pro rata balance sheet and pro rata income statement information reflect our proportionate economic ownership of each asset in our portfolio that we do not wholly own. These assets may be found in the table found earlier in this report entitled, "Unconsolidated Joint Venture Information." The amounts in the column labeled "Pro Rata Portion Unconsolidated Joint Ventures" were derived on a property-by-property basis by applying to each financial statement line item the ownership percentage interest used to arrive at our share of net income or loss during the period when applying the equity method of accounting. A similar calculation was performed for the amounts in the column labeled "Pro Rata Portion Noncontrolling interests."

We do not control the unconsolidated joint ventures and the presentations of the assets and liabilities and revenues and expenses do not represent our legal claim to such items. The operating agreements of the unconsolidated joint ventures generally provide that partners may receive cash distributions (1) quarterly, to the extent there is available cash from operations, (2) upon a capital event, such as a refinancing or sale or (3) upon liquidation of the venture. The amount of cash each partner receives is based upon specific provisions of each operating agreement and vary depending on factors including the amount of capital contributed by each partner and whether any contributions are entitled to priority distributions. Upon liquidation of the joint venture and after all liabilities, priority distributions and initial equity contributions have been repaid, the partners generally would be entitled to any residual cash remaining based on the legal ownership percentage shown in the table found earlier in this report entitled "Unconsolidated Joint Venture Information".

We provide pro rata balance sheet and income statement information because we believe it assists investors and analysts in estimating our economic interest in our unconsolidated joint ventures when read in conjunction with the Company's reported results under GAAP. The presentation of pro rata financial information has limitations as an analytical tool. Some of these limitations include:

- The amounts shown on the individual line items were derived by applying our overall economic ownership interest percentage determined when applying the equity method of accounting and do not necessarily represent our legal claim to the assets and liabilities, or the revenues and expenses; and
- Other companies in our industry may calculate their pro rata interest differently than we do, limiting the usefulness as a comparative measure.

Because of these limitations, the pro rata balance sheet and income statement information should not be considered in isolation or as a substitute for our financial statements as reported under GAAP. We compensate for these limitations by relying primarily on our GAAP results and using the pro rata balance sheet and income statement information only supplementally.
