Titan Pharmaceuticals to Present at Rodman & Renshaw 17th Annual Global Investment Conference

SOUTH SAN FRANCISCO, CA -- (Marketwired) -- 09/03/15 -- Titan Pharmaceuticals, Inc. (OTCQB: TTNP), a specialty pharmaceutical company developing proprietary therapeutics for the treatment of select chronic diseases utilizing its ProNeura™ long-term drug delivery technology, announced today that Sunil Bhonsle, president, will present at the Rodman & Renshaw 17th Annual Global Investment Conference on Thursday, September 10 at 3:25 p.m. at the St. Regis Hotel in New York. The presentation will take place in the Louis XVI B room.

Mr. Bhonsle will review Titan's development program for Probuphine® for the long-term maintenance treatment of opioid dependence, including the recent resubmission of the New Drug Application (NDA) for Probuphine to the U.S. Food and Drug Administration. He will also provide an overview of the company's ProNeura™ for Parkinson's disease program and other upcoming milestones for 2015.

About Titan Pharmaceuticals

Titan Pharmaceuticals Inc. (OTCQB: TTNP), based in South San Francisco, CA, is a specialty pharmaceutical company developing proprietary therapeutics primarily for the treatment of serious medical disorders. The company's lead product candidate is Probuphine®, a novel and long-acting formulation of buprenorphine for the long-term maintenance treatment of opioid dependence. Probuphine employs Titan's proprietary drug delivery system ProNeura™, which is ideally suited for delivering sustained, consistent levels of medication for three months or longer. Titan has granted North American commercial rights for Probuphine to Braeburn Pharmaceuticals. If approved, Probuphine would be the first and only commercialized treatment of opioid dependence to provide continuous, around-the-clock blood levels of buprenorphine for six months following a single procedure. The ProNeura technology has the potential to be used in developing products for treating other chronic conditions, such as Parkinson's disease, where maintaining consistent blood levels of a dopamine agonist may benefit the patient and improve medical outcomes.
