CNS Pharmaceuticals to Present at the Virtual Investor 2022 Top Picks Conference

Live video webcast presentation on Wednesday, January 26th at 11:00 AM ET

HOUSTON, Jan. 20, 2022 /PRNewswire/ --[CNS Pharmaceuticals, Inc.](#) (NASDAQ: CNSP) ("CNS" or the "Company"), a biopharmaceutical company specializing in the development of novel treatments for primary and metastatic cancers in the brain and central nervous system, today announced that John Climaco, Chief Executive Officer of CNS Pharmaceuticals, will participate in the [Virtual Investor 2022 Top Picks Conference](#) on Wednesday, January 26, 2022 at 11:00 AM ET.

As part of the virtual event, the Company will provide a corporate presentation, followed by a moderated interactive Q&A session. In addition to the moderated portion of the event, all investors and interested parties will have the opportunity to submit questions live during the event. Interested parties may also pre-submit questions in advance of the live event, which can be sent via the conference website at [virtualinvestorco.com](#). The Company will answer as many questions as possible during the event.

A [live video webcast](#) of the presentation will be available on the [Events](#) page of the [Investors](#) section of the Company's website ([cnspharma.com](#)). A webcast replay will be available two hours following the live presentation and will be accessible for one year.

About CNS Pharmaceuticals, Inc.

CNS Pharmaceuticals a clinical-stage pharmaceutical company developing a pipeline of anti-cancer drug candidates for the treatment of primary and metastatic cancers of the brain

and central nervous system. The Company's lead drug candidate, Berubicin, is a novel anthracycline and the first anthracycline to appear to cross the blood-brain barrier. Berubicin is currently in development for the treatment of a number of serious brain and CNS oncology indications including glioblastoma multiforme (GBM), an aggressive and incurable form of brain cancer.

Additionally, the Company is advancing the development of its WP1244 drug technology, which utilizes anthracycline and distamycin-based scaffolds to create small molecule agents and is believed to be 500x more potent than daunorubicin in inhibiting tumor cell proliferation. Preclinical studies of WP1244 demonstrated high uptake in the brain with antitumor activity. CNS Pharmaceuticals is evaluating the use of WP1244 in the treatment of brain cancers, pancreatic, ovarian, and lymphomas.
