Cautionary statement

FORWARD-LOOKING STATEMENTS. Statements of future events, conditions, expectations, plans, ambitions, or results in this presentation or the subsequent discussion period are forward-looking statements. Similarly, discussions of future carbon capture, transportation, and storage, as well as biofuels, hydrogen, direct air capture, and other plans to reduce emissions of ExxonMobil, its affiliates, or companies it is seeking to acquire, are dependent on future market factors, such as continued technological progress, policy support and timely rule-making and permitting, and represent forward-looking statements. Actual future results, including financial and operating performance; potential earnings, cash flow, and rates of return; total capital expenditures and mix, including allocations of capital to low carbon investments; realization and maintenance of structural cost reductions and efficiency gains, including the ability to offset inflationary pressures, plans to reduce future emissions intensity; ambitions to reach Scope 1 and Scope 2 net zero from operated assets by 2050, to reach Scope 1 and 2 net zero in Upstream Permian Basin unconventional operated assets by 2030 and Pioneer Permian assets by 2035, to eliminate routine flaring in-line with World Bank Zero Routine Flaring, to reach near-zero methane emissions from operated assets and other methane initiatives, to meet ExxonMobil’s emission reduction plans and goals, divestment and start-up plans, and associated project plans as well as technology advances, including in the timing and outcome of projects to capture and store CO₂, produce hydrogen, produce biofuels, produce lithium, create new advanced carbon materials, and use plastic waste as feedstock for advanced recycling, maintenance and turnaround activity, drilling and improvement programs; price and margin recovery; shareholder distributions; planned Pioneer or Denbury integration benefits; resource recoveries and production rates; and product sales levels and mix could differ materially due to a number of factors. These include global or regional changes in oil, gas, petrochemicals, or feedstock prices, differentials, seasonal fluctuations, or other market or economic conditions affecting the oil, gas, and petrochemical industries and the demand for our products; government policies supporting lower carbon and new market investment opportunities such as the U.S. Inflation Reduction Act or policies limiting the attractiveness of investments such as European taxes on energy and unequal support for different methods of carbon capture; policy and consumer support for emission-reduction products and technology; variable impacts of trading activities; the outcome of competitive bidding and project wins; regulatory actions targeting public companies in the oil and gas industry; changes in local, national, or international laws, regulations, and policies affecting our business including with respect to the environment; taxes, trade sanctions, and actions taken in response to pandemic concerns; the ability to realize efficiencies within and across our business lines and to maintain current cost reductions as efficiencies without impairing our competitive positioning; decisions to invest in future reserves; reservoir performance, including variability in unconventional projects; the level, outcome, and timing of exploration and development projects and decisions to invest in future resources; timely completion of construction projects; war, civil unrest, attacks against the company or industry, and other political or security disturbances; expropriations, seizures, and capacity, insurance or shipping limitations by foreign governments or international embargoes; changes in consumer preferences; opportunities for and regulatory approval of investments or divestments that may arise such as the Pioneer acquisition; the outcome of our or competitors' research efforts and the ability to bring new technology to commercial scale on a cost-competitive basis; the development and competitiveness of alternative energy and emission reduction technologies; unforeseen technical or operating difficulties including the need for unplanned maintenance; and other factors discussed here and in Item 1A. Risk Factors of our Form 10-K and under the heading “Factors Affecting Future Results” available through the Investors page of our website at www.exxonmobil.com. All forward-looking statements are based on management’s knowledge and reasonable expectations at the time of this presentation and we assume no duty to update these statements as of any future date. Neither future distribution of this material nor the continued availability of this material in archive form on our website should be deemed to constitute an update or re-affirmation of these figures as of any future date. Any future update of these figures will be provided only through a public disclosure indicating that fact.

The Pioneer transaction (merger) referenced throughout this presentation is subject to customary regulatory reviews and approvals.

Reconciliations and definitions of factors, non-GAAP, and other terms are provided in the text or in the supplemental information accompanying these slides beginning on page 25.
