Cadeler Opens New Taipei Office, Reinforcing Commitment to Asia-Pacific

TAIPEI, Taiwan--(BUSINESS WIRE)-- Cadeler – a leading global partner in offshore wind transportation and installation – today celebrates the relocation of its Taipei-based team to new, expanded offices in Xinyi, Taipei, underscoring the company’s focus on strengthening client collaboration and long-term growth in the Asia-Pacific region.

With the opening of this new office, Cadeler will be even better positioned to pursue and deliver offshore wind projects across the many growing markets in the region – from Taiwan’s well-developed offshore wind sector to emerging hubs such as Vietnam, the Philippines, South Korea, Australia, and beyond.

A pioneer in Taiwan’s offshore wind market

Following its merger with Seajacks/Eneti in 2023, Cadeler has built on a solid regional foundation in Taiwan. The company has been a pioneer in Taiwan’s offshore wind market, establishing a strong track record including Taiwan’s first commercial scale offshore wind farm, the Formosa 1.

Today, Cadeler has two vessels actively operating in Taiwanese waters, with Wind Maker installing 14 MW turbines at Ørsted’s Greater Changhua 2b & 4 Offshore Wind Farm and Wind Zaratan active on a long-term service agreement with Vestas.

Looking ahead, Cadeler’s vessels have secured a regional pipeline that runs through the end of the decade. In 2027, Wind Maker and her crew are contracted to install turbines at Copenhagen Infrastructure Partners’ Fengmiao 1 project. And in 2028, Cadeler will install Siemens Gamesa 14 MW turbines at [the Formosa 4 Offshore Wind Farm in Taiwan](#) developed by Synera Renewable Energy (SRE).

A region of opportunity

The Asia-Pacific region is a key growth market for offshore wind. Taiwan continues to lead, with several offshore wind farms already in operation and more in development. South Korea and Japan are raising their ambitions, and new opportunities lie ahead in deep-water markets such as Australia. Vietnam has reaffirmed its offshore wind targets, the Philippines has just launched its first auction, and Singapore is positioning itself as a key importer of renewable energy.

“Cadeler’s new Taipei office becomes the hub for expanding our regional footprint – supporting local teams, anchoring client relationships, and coordinating cross-border opportunities as we build momentum for the clean energy future across Asia-Pacific,” says Mikkel Gleerup, Cadeler CEO.

A workplace designed for collaboration

The new Taipei office is fully aligned with Cadeler's European office design and branding and will accommodate at least twice as many people, with room for further growth. It offers excellent views of the city skyline and sits right next to the newly opened Taipei Dome – a 40,000-capacity indoor stadium that hosts baseball games and international concerts.

"The new Taipei office is more than a workspace – it reflects our confidence in the region's potential across diverse markets. With two vessels already active in Taiwan and a strong pipeline ahead, the new Taipei office gives us the space and strength to meet growing demand," comments Tony Lu, APAC Manager at Cadeler.

About Cadeler:

Cadeler A/S is a global leader in offshore wind installation, operations, and maintenance services. Cadeler is a pure play company, operating solely in the offshore wind industry with an uncompromising focus on safety and the environment. Cadeler owns and operates the industry's largest fleet of jack-up offshore wind installation vessels and has for more than 10 years been a key supplier in the development of offshore wind energy to power millions of households. Cadeler's fleet, expertise and capacity to handle the largest and most complex next-generation offshore wind installation projects positions the company to deliver exceptional services to the industry. Cadeler is committed to being at the forefront of sustainable wind farm installation and to enabling the global energy transition towards a future built on renewable energy. Cadeler is listed on the New York Stock Exchange (ticker: CDLR) and the Oslo Stock Exchange (ticker: CADLR). For more information, please visit www.cadeler.com
