Cautionary Statement Regarding Forward-Looking Statements

This presentation as well as other written or oral statements by the Company may contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. We have based these forward-looking statements on our current opinions, expectations, intentions, beliefs, plans, objectives, assumptions and projections about future events and financial trends affecting the operating results and financial condition of our business. Although we believe that these forward-looking statements are reasonable, we cannot assure you that we will achieve or realize these plans, intentions, or expectations. Generally, statements that do not relate to historical facts, including statements concerning possible or assumed future actions, business strategies, events or results of operations, are forward-looking statements. The words "believe," "continue," "could," "estimate," "expect," "intend," "may," "might," "plan," "possible," "potential," "predict," "should," "will," "would," and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

Forward-looking statements in this presentation include, but are not limited to, statements regarding: expectations with respect to our financial and business performance; future benefits from growth initiatives; our healthy pipeline of acquisitions; expectations related to acquisitions; anticipated tariffs exposure; our recession-resilient business model; our expected growth; the impacts of modernization, including hiring key talent, upgrading technology, and improving key processes; essential nature of our services providing consistency in business growth; focus on pricing and productivity; healthy balance sheet positions us well to execute on capital allocation priorities; a balanced capital allocation strategy; continuous improvement; and healthy dividend.

These forward-looking statements are based on information available as of the date of this presentation, and current expectations, forecasts, and assumptions, and involve a number of judgments, risks and uncertainties. Important factors could cause actual results to differ materially from those indicated or implied by forward-looking statements including, but not limited to, those set forth in the sections entitled "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2024 and may also be described from time to time in our future reports filed with the SEC.

Accordingly, forward-looking statements should not be relied upon as representing our views as of any subsequent date, and we do not undertake any obligation to update forward-looking statements to reflect events or circumstances after the date they were made, whether as a result of new information, future events or otherwise, except as may be required by law.

Reconciliation of GAAP and Non-GAAP Financial Measures

A non-GAAP financial measure is a numerical measure of financial performance, financial position, or cash flows that either 1) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of income, statement of financial position or statement of cash flows, or 2) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented.

These measures should not be considered in isolation or as a substitute for revenues, net income, earnings per share or other performance measures prepared in accordance with GAAP. Management believes all of these non-GAAP financial measures are useful to provide investors with information about current trends in, and period-over-period comparisons of, the Company's results of operations. An analysis of any non-GAAP financial measure should be used in conjunction with results presented in accordance with GAAP.

The Company has used the following non-GAAP financial measures in this earnings presentation:

Organic revenues

Organic revenues are calculated as revenues less the revenues from acquisitions completed within the prior 12 months and excluding the revenues from divested businesses. Acquisition revenues are based on the trailing 12-month revenue of our acquired entities. Management uses organic revenues, and organic revenues by type to compare revenues over various periods excluding the impact of acquisitions and divestitures.

Adjusted operating income and adjusted operating margin

Adjusted operating income and adjusted operating margin are calculated by adding back to net income those expenses resulting from the amortization of intangible assets and adjustments to the fair value of contingent consideration resulting from the acquisitions of Fox Pest Control and Saela Pest Control. Adjusted operating margin is calculated as adjusted operating income divided by revenues. Management uses adjusted operating income and adjusted operating margin as measures of operating performance because these measures allow the Company to compare performance consistently over various periods.

Adjusted net income and adjusted EPS

Adjusted net income and adjusted EPS are calculated by adding back to the GAAP measures amortization of intangible assets and adjustments to the fair value of contingent consideration resulting from the acquisitions of Fox Pest Control and Saela Pest Control, excluding gains and losses on the sale of non-operational assets and gains on the sale of businesses, and by further subtracting the tax impact of those expenses, gains, or losses. Management uses adjusted net income and adjusted EPS as measures of operating performance because these measures allow the Company to compare performance consistently over various periods.

EBITDA, EBITDA margin, adjusted EBITDA, adjusted EBITDA margin, incremental EBITDA margin and adjusted incremental EBITDA margin

EBITDA is calculated by adding back to net income depreciation and amortization, interest expense, net, and provision for income taxes. EBITDA margin is calculated as EBITDA divided by revenues. Adjusted EBITDA and adjusted EBITDA margin are calculated by further adding back those expenses resulting from the adjustments to the fair value of contingent consideration resulting from the acquisitions of Fox Pest Control and Saela Pest Control, and excluding gains and losses on the sale of non-operational assets and gains on the sale of businesses. Management uses EBITDA, EBITDA margin, adjusted EBITDA and adjusted EBITDA margin as measures of operating performance because these measures allow the Company to compare performance consistently over various periods. Incremental EBITDA margin is calculated as the change in EBITDA divided by the change in revenue. Management uses incremental EBITDA margin as a measure of operating performance because this measure allows the Company to compare performance consistently over various periods. Adjusted incremental EBITDA margin is calculated as the change in adjusted EBITDA divided by the change in revenue. Management uses adjusted incremental EBITDA margin as a measure of operating performance because this measure allows the Company to compare performance consistently over various periods.

Free cash flow and free cash flow conversion

Free cash flow is calculated by subtracting capital expenditures from cash provided by operating activities. Management uses free cash flow to demonstrate the Company's ability to maintain its asset base and generate future cash flows from operations. Free cash flow conversion is calculated as free cash flow divided by net income. Management uses free cash flow conversion to demonstrate how much net income is converted into cash. Management believes that free cash flow is an important financial measure for use in evaluating the Company's liquidity. Free cash flow should be considered in addition to, rather than as a substitute for, net cash provided by operating activities as a measure of our liquidity. Additionally, the Company's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, management believes it is important to view free cash flow as a measure that provides supplemental information to our consolidated statements of cash flows.

Adjusted sales, general, and administrative ("SG&A")

Adjusted SG&A is calculated by removing the adjustments to the fair value of contingent consideration resulting from the acquisitions of Fox Pest Control and Saela Pest Control. Management uses adjusted SG&A to compare SG&A expenses consistently over various periods.

Leverage ratio

Leverage ratio, a financial valuation measure, is calculated by dividing adjusted net debt by adjusted EBITDAR. Adjusted net debt is calculated by adding short-term debt and operating lease liabilities to total long-term debt less a cash adjustment of 90% of total consolidated cash. Adjusted EBITDAR is calculated by adding back to net income depreciation and amortization, interest expense, net, provision for income taxes, operating lease cost, and stock-based compensation expense. Management uses leverage ratio as an assessment of overall liquidity, financial flexibility, and leverage.

Key Takeaways

Focus on Modernization

Hiring key talent across the organization to accelerate modernization efforts

Focus on upgrading technology and executing continuous improvement across key processes

Promoted new Chief Operating Officer of Commercial Operations for Orkin USA to further support our commercial efforts

Exceptional Performance

Robust Q2 revenue growth of 12.1%; organic growth[1] of 7.3% and 4.8% from M&A

Healthy pipeline of acquisitions supports 3-4% growth from M&A in 2025

Essential nature of services provides consistency in business growth across all cycles

Margins Remain a Focus

Focus on pricing and productivity has resulted in increased margins across several key income statement categories

Leveraged people costs, as well as sales & marketing expenses, despite increased spend associated with peak season

Excluding a $6 million (~70 bps) adjustment to our reserve associated with a handful of legacy auto claims, incremental margins would have been approximately 25%

Balance Sheet Provides Flexibility

Healthy balance sheet positions us well to execute on capital allocation priorities

Q2 operating cash flow and free cash flow[1] grew 21% and 23%, respectively; YTD operating cash flow and free cash flow[1] grew 18% and 20%, respectively

Q2 free cash flow[1] conversion of ~119+%; YTD free cash flow[1] conversion of ~125%

Our leverage ratio[2] stands at 0.9x
