Fusion Announces Technology Certification With Mitel

NEW YORK, NY -- (Marketwired) -- 01/26/16 -- Fusion (NASDAQ: FSNN) a leading provider of cloud services, announced today that its award-winning cloud communications solution has been certified compliant with the interoperability requirements of Mitel, a global leader in real-time business, cloud and mobile communications.

The successful completion of the Mitel-Compatible Test (MCT) certification process on the Mitel MiVoice Business Release 7.2 and the Mitel MiVoice Office 250 Release 6.1 business communications platforms allows Mitel customers to enjoy the service benefits and cost advantages of Fusion's advanced cloud-based SIP Trunking solution without having to replace existing equipment or infrastructure.

"Building and maintaining the right technology relationships to deliver customers high-value integrated solutions is a critical component for success in the business communications marketplace," said David Lowenstein, Director of Business Development for Mitel Solutions Alliance. "Mitel works with best-of-breed companies like Fusion to deliver complete solutions that address the business challenges of our customers."

Russell P. Markman, President of Business Services at Fusion, commented, "Fusion and Mitel share a commitment to deliver high value communications solutions to our customers, protecting their technology investments and increasing productivity while reducing costs. We are pleased to have successfully met Mitel's MCT certification requirements and are excited about providing our Mitel partners with Fusion's advanced, secure and reliable SIP trunking solution."

About Fusion

Fusion is a leading provider of integrated cloud solutions to small, medium and large businesses. Fusion's advanced, proprietary cloud service platform enables the integration of leading edge solutions in the cloud, including cloud communications, cloud connectivity, and cloud computing. Fusion's innovative, yet proven cloud solutions lower our customers' cost of ownership, and deliver new levels of security, flexibility, scalability, and speed of deployment.
