# Interpace Diagnostics Enters into Agreement with University of Maryland Medical System

*Agreement Provides Access to Company's Available Molecular Diagnostic Tests*

PARSIPPANY, NJ, Jan. 14, 2019 (GLOBE NEWSWIRE) -- Interpace Diagnostics Group (NASDAQ: IDYG) has entered into an Agreement with the University of Maryland Medical System (UMMS), which will provide physicians access to ThyGeNEXT™, ThyraMIR®, and PancraGEN® across the entire UMMS network. Physicians can utilize ThyGeNEXT™ and ThyraMIR® to assess indeterminate thyroid nodules and PancraGEN® for indeterminate pancreatic cysts and solid lesions.

The UMMS network is a university-based regional health care system focused on serving the health care needs of the State of Maryland. As one of the largest private employers in the State of Maryland, the health system's 25,000 employees and 4,000 affiliated physicians provide primary and specialty care in more than 150 locations and at 14 hospitals. The University of Maryland Medical Center in Baltimore, the UMMS flagship academic campus, is recognized regionally and nationally for excellence and innovation in specialized care, including cancer of all types.

Jack Stover, President and Chief Executive Officer of Interpace, said, "We are very pleased that the physicians and patients within the renowned University of Maryland Medical System now have access to our molecular tests for both thyroid and pancreatic cancer."

## **About Interpace Diagnostics Group, Inc.**

Interpace is a fully integrated commercial and bioinformatics company that provides clinically useful molecular diagnostic tests and pathology services for evaluating risk of cancer by leveraging the latest technology in personalized medicine for improved patient diagnosis and management. The Company currently has four commercialized molecular tests and one test in a clinical evaluation process (CEP); PancraGEN® for the diagnosis and prognosis of pancreatic cancer from pancreatic cysts; ThyGeNEXT™ for the diagnosis of thyroid cancer from thyroid nodules utilizing a next generation sequencing assay; ThyraMIR® for the diagnosis of thyroid cancer from thyroid nodules utilizing a proprietary gene expression assay; and RespriDX™ that differentiates lung cancer of primary vs. metastatic origin. BarreGEN® for Barrett's Esophagus, is currently being "soft launched" with key opinion leaders as we continue to gather data on this assay that will assist us in seeking favorable reimbursement as well as important clinical information. Barrett's Esophagus is a rapidly growing diagnosis that affects over three million people in the US and over time can progress to esophageal cancer. The Company's data base includes data from over 50,000 patients who have been tested using the Company's current products, including over 25,000 molecular tests for thyroid nodules. Interpace has been designated by the 2018 edition of

CIO Applications as one of the top 10 companies for providing bioinformatics solutions. Interpace's mission is to provide personalized medicine through molecular diagnostics, innovation and data to advance patient care based on rigorous science. ## Forward Looking Statements

*This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995, relating to the Company's future financial and operating performance, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond the Company's control. These statements also involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results to be materially different from those expressed or implied by any forward-looking statement. Known and unknown risks, uncertainties and other factors include, but are not limited to, the Company's history of losses, the Company's ability to adequately finance the business, the market's acceptance of its molecular diagnostic tests, its ability to retain or secure reimbursement, its ability to secure additional business and generate higher profit margins through sales of its molecular diagnostic tests, in-licensing or other means, projections of future revenues, growth, gross profit and anticipated internal rate of return on investments and its ability to maintain its NASDAQ listing. Additionally, all forward-looking statements are subject to the "Risk Factors" detailed from time to time in the Company's SEC filings, including its Annual Report on Form 10-K for the fiscal year ended December 31, 2017, filed on March 23, 2018, Quarterly Reports on Form 10-Q and other SEC filings. Because of these and other risks, uncertainties and assumptions, undue reliance should not be placed on these forward-looking statements. In addition, these statements speak only as of the date of this press release and, except as may be required by law, the Company undertakes no obligation to revise or update publicly any forward-looking statements for any reason.*
