- As we proceed toward year-over-year growth, our focus shifts to reviewing our business in pressure waves rather than weekly order rates
- The pressure wave shows that in Q3 we expect to be at the low end of the 5-year range (pre-COVID) and in Q4 be squarely back in range

The pressure wave to the left shows the peaks and valleys of the five-year sales range and the overall cyclicity of our business

Financials

- Sales: \$121M
- Core sales decline of 11% (Product down 11% and Service down 12%)
- Adjusted EBITDA decremental margins of 29%, excluding the impact of currency (better than our target range of 35-45%) driven by mix and additional SAE costs

We are encouraged by the level of activity that we are beginning to see as our primary markets recover

Sentiment has shifted to growth in coming quarters but variance remains as to how much growth and how fast the recovery will happen

Despite continued economic uncertainty, barring any additional COVID related shutdowns, we anticipate the top line returning to pre-COVID levels as we exit the fiscal year.
