Kodiak Gas Services Establishes \$50,000 Endowment for Oklahoma State University Institute of Technology

Funds will support scholarships for students and help advance the compression industry workforce

MONTGOMERY, Texas, April 7, 2022 /PRNewswire/ -- [Kodiak Gas Services, LLC](#) (Kodiak), a leading provider of contract compression services, today announced a \$50,000 donation to Oklahoma State University Institute of Technology (OSUIT) to establish an endowment for scholarships. The endowment will support students who need financial assistance and help advance the skills and training of future compression industry technicians.

"We're excited to contribute to the future of our industry by providing scholarships to the students at OSU Institute of Technology," said Mickey McKee, president and chief executive officer of Kodiak. "High-quality, well-trained technicians are always in demand, and we're glad that Kodiak is able to help more students who may need our support. Our goal through this endowment is to ensure that students can pursue their educational goals for years to come."

The scholarship supports students pursuing an Associate in Applied Science in Industrial Maintenance Technologies - Natural Gas Compression Technologies. The scholarship will be offered to students who meet pre-determined criteria and will be awarded starting in the fall of 2022.

OSUIT is a recognized leader in applied technology education and is known for world-class teaching facilities, partnerships with industry and a nearly 100 percent career placement rate.

OSUIT's Natural Gas Compression Technologies program is taught by industry-expert faculty and supported by leading natural gas compression producers and suppliers. The curriculum is focused on hands-on instruction in lab environments, reinforced with paid internships by industry employers.

"We are grateful for Kodiak's generous gift and their investment in our students," said Steve Olmstead, dean of the School of Engineering & Construction Technologies at OSUIT. "This endowment will open new doors for students and enhance our compression technology curriculum and industry collaboration to ensure our graduates are well-equipped when they enter the workforce."
