Institutional Shareholder Services, Inc. (ISS) Recommends That Cryo-Cell Shareholders Vote FOR All Management Nominees

'ISS Believes That Management's Plans Regarding the Direction of the Company Are Much More Substantive Than Those Presented By the Dissident'

OLDSMAR, Fla., July 5 /PRNewswire-FirstCall/ -- Cryo-Cell International Inc. (OTC Bulletin Board: CCEL), announced today that Institutional Shareholder Services, Inc. (ISS) one of the nation's leading independent proxy advisory firms, recommended that Cryo-Cell shareholders vote unanimously FOR all Cryo-Cell nominees on the Company's WHITE proxy card at the Company's July 16, 2007 Annual Meeting, citing their independent view that management's plans for the Company's future are "much more substantive" than those of the dissident Portnoy group.

"We are gratified that both ISS and Glass Lewis recommend that Cryo-Cell shareholders vote for all of management's director nominees at the July 16, 2007 Annual Meeting," said Mercedes Walton, Cryo-Cell's Chairman and CEO. "ISS and Glass Lewis are widely recognized as the nation's two leading independent proxy voting and corporate governance advisory firms. Their analyses and recommendations are relied upon by hundreds of major institutional investment firms, mutual funds and fiduciaries throughout the United States."

In recommending that Cryo-Cell shareholders vote FOR Cryo-Cell's incumbent directors and AGAINST the nominees of David Portnoy and his associates, the ISS report states*:

"Our review of the stock performance for Cryo-Cell, VIAC [ViaCell] and CBAI [Cord Blood America] since April 2005 (when FDA introduced new regulatory standards) indicates comparable performance. Additionally, Cryo-Cell's stock price outperformed both its peers over a 2 year period..."

"...The decline in CCEL's margins have been in line with that of its peers..."

"...The dissident...did not present any specific, detailed plan for the company. More importantly, the dissident did not have any specific strategic recommendations for the company. As noted above, ISS prefers dissidents seeking board control, to present a detailed plan for the company, which could then be compared with that of the management's current plan. In this case, the management seems to have a distinct plan, which is to diversify by introducing the new MPSC service. Although it is difficult for ISS to ascertain the future success of management's strategy, we note the market seems to have responded

positively to management's initiatives. For instance, Cryo-Cell's stock price is up 21.7% since announcement of its 1Q FY2007 result on April 16, 2007."

"...Further, ISS believes that management's plans regarding the direction of the company are much more substantive than those presented by the dissident. As such, ISS recommends that shareholders vote FOR the management nominees on the WHITE proxy card."

The Company urges shareholders to vote FOR the Board's nominees by signing, dating and returning the WHITE proxy card and to discard the gold proxy card of the dissident group. Any shareholders requiring assistance may contact Georgeson Inc., which is providing Cryo-Cell with proxy solicitation services, at (888) 605-7511.

Forward-Looking Statement

Statements wherein the terms "believes", "intends", "projects" or "expects" as used are intended to reflect "forward-looking statements" of the Company. The information contained herein is subject to various risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in such forward-looking statements or paragraphs, many of which are outside the control of the Company. These uncertainties and other factors include the uncertainty of market acceptance of any potential service offerings relating to types of stem cells other than cord blood stem cells, given that such new stem cells have not yet been used in human therapies, and treatment applications using such stem cells are subject to further research; the need to complete certain developments, including completion of clinical validation and testing, before any such process can be commercialized, and the Company's development of its final business and economic model in offering any such service; any adverse effect or limitations caused by recent increases in government regulation of stem cell storage facilities; any increased competition in our business; any decrease or slowdown in the number of people seeking to store umbilical cord blood stem cells or decrease in the number of people paying annual storage fees; any adverse impacts on our revenue or operating margins due to the costs associated with increased growth in our business, including the possibility of unanticipated costs relating to the operation of our new facility; any technological breakthrough or medical breakthrough that would render the Company's business of stem cell preservation obsolete; any material failure or malfunction in our storage facilities; any natural disaster such as a tornado, other disaster (fire) or act of terrorism that adversely affects stored specimens; the costs associated with defending or prosecuting litigation matters and any material adverse result from such matters; decreases in asset valuations; any continued negative effect from adverse publicity in the past year regarding the Company's business operations; any

negative consequences resulting from deriving, shipping and storing specimens at a second location; and other risks and uncertainties. The foregoing list is not exhaustive, and the Company disclaims any obligations to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements. Readers should carefully review the risk factors described in other documents the Company files from time to time with the Securities and Exchange Commission, including the most recent Annual Report on Form 10-KSB, Quarterly Reports on Form 10-QSB and any Current Reports on Form 8-K filed by the Company.
