Add back non-cash provision for uncollectible accounts receivable and deferred revenue.....	3,935
Add back acquisition costs.....	1,561
Add back nursing home expenses.....	4,882
Add back non-cash restricted stock compensation expense.....	479
Adjusted funds from operations available to common stockholders.....	\$ 30,842
 Adjusted funds from operations per share available to common stockholders.....	 \$ 0.3604

Funds From Operations, ("FFO"), adjusted FFO, EBITDA, adjusted EBITDA, adjusted fixed charges, adjusted total debt, adjusted book capitalization and related ratios are non-GAAP financial measures. For purposes of the Securities and Exchange Commission's ("SEC") Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. As used herein, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently, FFO is defined as net income available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization. The Company believes that FFO is an important supplemental measure of its operating performance. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

The Company uses FFO as one of several criteria to measure operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods. The Company offers this measure to assist the users of its financial statements in analyzing its performance; however, this is not a measure of financial performance under GAAP and should not be considered a measure of liquidity, an alternative to net income or an indicator of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on non-GAAP financial measures as a substitute for any GAAP measure, including net income.

Adjusted FFO is calculated as FFO available to common stockholders less non-cash stock-based compensation and one-time revenue and expense items. The Company believes that adjusted FFO provides an enhanced measure of the operating performance of the Company's core portfolio as a REIT. Funds Available for Distribution is calculated as Adjusted FFO less scheduled principal payments on mortgages, non-cash interest expense and non-cash revenue, such as straight-line rent. Funds Available for Distribution provides a supplemental measure of the Company's ability to incur and service debt and to distribute dividends to shareholders. The Company's computation of adjusted FFO and Funds Available for Distribution are not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes they are appropriate measures for this Company.

Our ratios of debt to annualized EBITDA, debt to adjusted annualized EBITDA and debt to adjusted pro forma annualized EBTTDA as of December 31, 2009 were 4.9x, 4.3x and 3.7x, respectively. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA eliminates items such as nursing home revenues and expenses and adds back certain non-cash expenses, if any, to EBITDA. Adjusted pro forma EBITDA adds to adjusted EBITDA the incremental EBITDA from new investments made during the 4th quarter assuming an October 1 purchase date. EBITDA, adjusted EBITDA, adjusted pro forma EBITDA and related ratios are non-GAAP financial measures. Annualized EBITDA, adjusted annualized EBITDA and adjusted pro forma annualized EBITDA assume the current quarter results multiplied by four, and are not projections of future performance. Below is the reconciliation of EBITDA, adjusted EBITDA and adjusted pro forma EBITDA to net income.

DEBT

Revolving line of credit.....	\$ 94,100
Secured borrowings.....	159,354
Unsecured borrowings (1).....	485,000
Total debt.....	\$ 738,454

Total debt / annualized EBITDA ratio..... **4.9 x**

Total debt / adjusted annualized EBITDA ratio..... **4.3 x**

Total debt / adjusted pro forma annualized EBITDA ratio..... **3.7 x**

(1) Excludes net discount on unsecured borrowings.

Our annualized EBITDA to fixed charge coverage ratio, adjusted annualized EBITDA to total interest expense ratio, adjusted annualized EBITDA to fixed charge coverage ratio and adjusted pro forma annualized EBITDA to adjusted pro forma fixed charge coverage ratio as of December 31, 2009 were 3.0x, 4.2x, 3.5x and 3.2x, respectively. Fixed charge coverage is the ratio determined by dividing annualized EBITDA by our fixed charges. Annualized EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted annualized EBITDA eliminates items such as nursing home revenues and expenses and adds back certain non-cash expenses, if any, to annualized EBITDA.

Adjusted proforma EBITDA adds to adjusted EBITDA the incremental EBITDA from new investments made during the 4th quarter assuming an October 1 purchase date. Fixed charges consist of interest expense, amortization of deferred financing costs, refinancing costs and regularly occurring preferred dividends. Adjusted pro forma fixed charges adds to fixed charges the incremental interest expense associated with additional debt used to purchase the new investments assuming an October 1st purchase date. EBITDA, adjusted EBITDA, adjusted pro forma EBITDA, fixed charges, adjusted pro forma fixed charges and related ratios are non-GAAP measures. Below is the reconciliation of EBITDA to net income.

(2) Excludes cash from asset sales and mortgage payoffs.

Percentages of total debt to book capitalization, adjusted total debt to adjusted book capitalization and adjusted total debt to total market capitalization at December 31, 2009 were 46.0%, 45.9% and 28.8%, respectively. Adjusted total debt is total debt plus the discount or less the premium derived from the sale of unsecured borrowings. Book capitalization is defined as total debt plus stockholders' equity. Adjusted book capitalization is defined as adjusted total debt plus stockholders' equity. Adjusted total debt, adjusted book capitalization and related ratios are non-GAAP financial measures. Total market capitalization is the total market value of our securities as of December 31, 2009 plus adjusted total debt.
