Omega Announces First Quarter 2009 Financial Results; Adjusted FFO of \$0.37 Per Share for the First Quarter

HUNT VALLEY, Md.--(BUSINESS WIRE)-- Omega Healthcare Investors, Inc. (NYSE:OHI) today announced its results of operations for the quarter ended March 31, 2009. The Company also reported Funds From Operations ("FFO") available to common stockholders for the three months ended March 31, 2009 of \$33.6 million or \$0.41 per common share. The \$33.6 million of FFO available to common stockholders for the first quarter includes a \$4.5 million of one-time net cash inflow associated with a legal settlement, a net loss of \$0.9 million associated with owned and operated assets, \$0.5 million of non-cash restricted stock expense and a \$0.1 million non-cash provision for impairment on a real estate asset. FFO is presented in accordance with the guidelines for the calculation and reporting of FFO issued by the National Association of Real Estate Investment Trusts ("NAREIT"). Adjusted FFO was \$0.37 per common share for the three months ended March 31, 2009. FFO and Adjusted FFO are non-GAAP financial measures. Adjusted FFO excludes the impact of certain non-cash items and certain items of revenue or expenses, including: results of operations of owned and operated facilities during the period, a legal settlement, a non-cash provision for impairment, and restricted stock expense. For more information regarding FFO and adjusted FFO, see the "Funds From Operations" section below.

GAAP NET INCOME

For the three-month period ended March 31, 2009, the Company reported net income of \$24.9 million, net income available to common stockholders of \$22.6 million, or \$0.27 per diluted common share and operating revenues of \$49.2 million. This compares to net income of \$17.2 million, net income available to common stockholders of \$14.8 million, or \$0.21 per diluted common share, and operating revenues of \$40.9 million for the same period in 2008.

The increases in net income and net income available to common stockholders were primarily due to the impact of: i) \$4.5 million of cash flow associated with a legal settlement; ii) revenue associated with \$178 million of new investments completed since March 2008 and iii) a \$0.9 million reduction in interest expense. This impact was partially offset by: i) increased depreciation expense associated with the new investments and ii) a \$0.9 million net loss associated with owned and operated assets.

FIRST QUARTER 2009 RESULTS

Operating Revenues and Expenses - Operating revenues for the three months ended March 31, 2009, excluding nursing home revenues of owned and operated assets and therefore on a non-GAAP basis, were \$44.7 million. Operating expenses for the three months ended March 31, 2009, on a non-GAAP basis excluding nursing home expenses for owned and operated assets, totaled \$14.2 million, comprised of \$10.9 million of depreciation and amortization expense, \$2.7 million of general and administrative expenses, \$0.5 million of

restricted stock expense and a real estate impairment of \$0.1 million. A reconciliation of these amounts to revenues and expenses reported in accordance with GAAP is provided at the end of this release.

Other Income and Expense - Other income and expense for the three months ended March 31, 2009 was a net expense of \$4.7 million and was primarily comprised of \$8.8 million of interest expense and \$0.5 million of amortization of deferred financing costs. These expenses were partially offset by a one-time cash inflow of \$4.5 million associated with a legal settlement.

In 1999, the Company filed suit against a former tenant seeking damages based on claims of breach of contract. The defendants denied the allegations made in the lawsuit. In June 2008, the Company was awarded damages in a jury trial. The case was then settled prior to appeal. In settlement of the Company's claim against the defendants, the Company agreed in January 2009 to accept a lump sum cash payment of \$6.8 million. The cash proceeds were offset by related expenses incurred of \$2.3 million, resulting in a net gain of \$4.5 million paid in January 2009.

Funds From Operations - For the three months ended March 31, 2009, reportable FFO available to common stockholders was \$33.6 million, or \$0.41 per common share, compared to \$23.7 million, or \$0.34 per common share, for the same period in 2008. The \$33.6 million of FFO for the quarter includes the impact of a \$4.5 million legal settlement, a \$0.9 million net loss associated with owned and operated assets, \$0.5 million of non-cash restricted stock expense and a real estate impairment of \$0.1 million.

The \$23.7 million of FFO for the three months ended March 31, 2008, includes the impact of: i) a \$1.5 million non-cash impairment; ii) \$0.7 million collected from a claim associated with a prior operator's past due rental obligations; iii) \$0.5 million of non-cash restricted stock expense and iv) \$45,000 of non-cash FIN 46R consolidation adjustments required in 2008.

When excluding the above mentioned items in 2009 and 2008, adjusted FFO was \$30.5 million, or \$0.37 per common share, for the three months ended March 31, 2009, compared to \$25.0 million, or \$0.36 per common share, for the same period in 2008. For further information, see the attached "Funds From Operations" schedule and notes.

2009 ADJUSTED FFO GUIDANCE AFFIRMATION

The Company affirms its 2009 adjusted FFO available to common stockholders guidance of between \$1.47 and \$1.50 per diluted share, as previously announced on February 6, 2009.

The Company's adjusted FFO guidance for 2009 excludes the impacts of future acquisitions, gains and losses from the sale of assets, additional divestitures, certain revenue and expense items, capital transactions and restricted stock amortization expense. A reconciliation of the adjusted FFO guidance to the Company's projected GAAP earnings is provided on a schedule attached to this press release. The Company may, from time to time, update its publicly announced adjusted FFO guidance, but it is not obligated to do so.

The Company's adjusted FFO guidance is based on a number of assumptions, which are subject to change and many of which are outside the control of the Company. If actual results vary from these assumptions, the Company's expectations may change. Without limiting the generality of the foregoing, the completion of acquisitions, divestitures, capital and financing transactions, variations in restricted stock amortization expense, and the factors identified below may cause actual results to vary materially from our current expectations. There can be no assurance that the Company will achieve its projected results.

(1) Includes amounts in discontinued operations

This press release includes Funds From Operations, or FFO, which is a non-GAAP financial measure. For purposes of the Securities and Exchange Commission's Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable financial measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable financial measure so calculated and presented. As used in this press release, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently, FFO is defined as net income available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization. The Company believes that FFO is an important supplemental measure of its operating performance. Because the historical cost accounting

convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

In February 2004, NAREIT informed its member companies that it was adopting the position of the SEC with respect to asset impairment charges and would no longer recommend that impairment write-downs be excluded from FFO. In the tables included in this press release, the Company has applied this interpretation and has not excluded asset impairment charges in calculating its FFO. As a result, its FFO may not be comparable to similar measures reported in previous disclosures. According to NAREIT, there is inconsistency among NAREIT member companies as to the adoption of this interpretation of FFO. Therefore, a comparison of the Company's FFO results to another company's FFO results may not be meaningful.

The Company uses FFO as one of several criteria to measure the operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and between other REITs. The Company offers this measure to assist the users of its financial statements in analyzing its performance; however, this is not a measure of financial performance under GAAP and should not be considered a measure of liquidity, an alternative to net income or an indicator of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on this measure as a substitute for any GAAP measure, including net income.

Adjusted FFO is calculated as FFO available to common stockholders less non-cash stock-based compensation and one-time revenue and expense items. The Company believes that adjusted FFO provides an enhanced measure of the operating performance of the Company's core portfolio as a REIT. The Company's computation of adjusted FFO is not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes it is an appropriate measure for this Company.

The following table presents a reconciliation of our guidance regarding 2009 FFO and Adjusted FFO to net income available to common stockholders:

This press release includes references to revenues and expenses excluding nursing home and operated assets, which are non-GAAP financial measures. The Company believes that presentation of the Company's revenues and expenses, excluding nursing home owned and operated assets, provides a useful measure of the operating performance of the Company's core portfolio as a real estate investment trust in view of the disposition of all but two of the Company's owned and operated assets and short term holding of owned and operated assets. The table below reconciles reported revenues and expenses to revenues and expenses excluding nursing home revenues and expenses of owned and operated assets.
