2016 RECENT FINANCING ACTIVITIES

Amendment to the 2014 Credit Facilities – Adding a \$350 Million Term Loan Facility – On January 29, 2016, the Company amended its 2014 Credit Facilities (defined below) to add a \$350 million term loan facility. As a result of the amendment, the 2014 Credit Facilities now provides for a \$1.25 billion senior unsecured revolving credit facility (the "Revolving Credit Facility"), a \$200 million senior unsecured term loan facility (the "Tranche A-1 Term Loan Facility"), a \$200 million senior unsecured incremental term loan facility (the "Tranche A-2 Term Loan Facility") and a \$350 million senior unsecured incremental term loan facility (the "Tranche A-3 Term Loan Facility" and, together with the Revolving Credit Facility, the Tranche A-1 Term Loan Facility and the Tranche A-2 Term Loan Facility, collectively, the "Omega Credit Facilities"). The Revolving Credit Facility matures on June 27, 2018, subject to a one-time option for Omega to extend such maturity date for one year. Exercise of such extension option is subject to compliance with a notice requirement and other customary conditions. The Tranche A-1 Term Loan Facility matures on June 27, 2019. The Tranche A-2 Term Loan Facility matures on June 27, 2017, subject to Omega's option to extend the maturity date of the Tranche A-2 Term Loan Facility twice, the first extension until June 27, 2018 and the second extension until June 27, 2019. The Tranche A-3 Term Loan Facility matures on January 29, 2021. The Tranche A-1 Term Loan Facility, the Tranche A-2 Term Loan Facility and the Tranche A-3 Term Loan Facility may be referred to collectively herein as the "Omega Term Loan Facilities".

The Tranche A-3 Term Loan Facility is priced at LIBOR plus an applicable percentage (beginning at 150 basis points, with a range of 100 to 195 basis points) based on our ratings from Standard & Poor's, Moody's and/or Fitch Ratings. The entire amount of the Tranche A-3 Term Loan Facility was advanced on January 29, 2016. The Company used the proceeds from the Tranche A-3 Term Loan Facility to repay existing indebtedness and for general corporate purposes.

As of February 4, 2015, the Company had \$30 million of outstanding borrowings under its \$1.25 billion revolver and \$1.10 billion of outstanding term loan borrowings.

2015 FOURTH QUARTER FINANCING ACTIVITIES

\$25.1 Million HUD Mortgage Payoffs – On December 31, 2015, the Company paid approximately \$25.1 million to retire two mortgage loans guaranteed by the U.S. Department of Housing and Urban Development ("HUD"). The loan was assumed as part of a 2011 acquisition, and had a blended interest rate of 5.5% per annum with maturities on March 1 and April 1, 2036. The payoff resulted in a \$0.9 million gain on the extinguishment of the debt due to the write-off of the \$2.1 million fair value adjustment recorded at the time of acquisition offset by a prepayment fee of approximately \$1.2 million.

\$250 Million Term Loan Facility - On December 16, 2015, the Company entered into a

\$250 million senior unsecured 7-year term loan facility (the "\$250M Term Loan Facility"). The \$250M Term Loan Facility is priced at LIBOR plus an applicable percentage (beginning at 180 basis points, with a range of 140 to 235 basis points) based on our ratings from Standard & Poor's, Moody's and/or Fitch Ratings. The \$250M Term Loan Facility may be increased to an aggregate amount of \$400 million. The Company used the proceeds from this loan to repay existing indebtedness and for general corporate purposes. The \$250M Term Loan Facility matures on December 16, 2022 with interest payments due monthly.

As a result of exposure to interest rate movements associated with the \$250M Term Loan Facility, on December 16, 2015, the Company entered into various forward-starting interest rate swap arrangements, which effectively converted \$250 million of the Company's variable-rate debt based on one-month LIBOR to an aggregate fixed rate of approximately 3.8005% effective December 30, 2016. The effective fixed rate achieved by the combination of the \$250M Term Loan Facility and the interest rate swaps could vary up by 55 basis points or down by 40 basis points based on future changes to the Company's credit ratings. Each of these swaps begins on December 30, 2016 and matures on December 15, 2022. On the date of inception, the Company designated the interest rate swaps as a cash flow hedge in accordance with Accounting Standards Codification on accounting for derivatives and hedges and linked the interest rate swap to the Term Loan. Because the critical terms of the interest rate swaps and \$250M Term Loan Facility coincide, the hedge is expected to exactly offset changes in expected cash flows as a result of fluctuations in 1-month LIBOR over the term of the hedge. The purpose of entering into the swaps was to reduce the Company's exposure to future changes in variable interest rates. The interest rate swaps settle on a monthly basis when interest payments are made. These settlements will occur through the maturity date of the \$250M Term Loan Facility. The interest rate for the \$250M Term Loan Facility is not hedged for the portion of the term prior to December 30, 2016.

\$575 Million Senior Notes Redemption – On October 26, 2015, the Company redeemed all of its outstanding 6.75% Senior Notes due 2022 (the "2022 Notes"). As a result of the redemption, during the fourth quarter of 2015, the Company recorded approximately \$21.3 million in redemption related costs and write-offs, including \$19.4 million for the early redemption or call premiums and \$1.9 million in net write-offs associated with unamortized deferred financing costs and original issuance premiums/discounts.

On September 25, 2015, the Company irrevocably deposited approximately \$615.0 million with the trustee of the 2022 Notes. This amount included a redemption premium of 3.375%, semi-annual interest and additional accrued interest to the redemption date of October 26, 2015 (approximately \$0.9 million for September and \$2.8 million for October). The \$615.0 million was classified as "Other assets" on the Company's balance sheet at September 30, 2015.

- (1) During the fourth quarter of 2015, the Company updated its purchase accounting analysis for the Aviv acquisition via merger. Accounting rules require purchase accounting allocations to be completed within one year of the acquisition date. It also allows adjustments to preliminary purchase accounting allocations to be recorded currently, not retrospectively, and requires disclosure of the adjustments. The Company expects to complete the purchase accounting analysis during the first quarter of 2016. As a result of updated information, the Company increased the net in-place lease liabilities assumed in the Aviv merger (which required the Company to update amortization associated with the assumed Aviv in-place leases). During the fourth quarter of 2015, the Company recorded \$5.4 million of additional amortization associated with the updated valuation of the assumed in-place leases that would have been recorded in second and third quarter of 2015 had the updated information been known (the "Catch-up Adjustment"). No full year adjustment is required since the fourth quarter Catch-up Adjustment is related to "timing of amortization" of the assumed in-place leases. Fourth quarter AFFO excluded (deducted) the \$5.4 million Catch-up Adjustment from Non-cash revenues for the quarter.
- (2) On September 25, 2015, the Company irrevocably deposited approximately \$615.0 million to the trustee to call and redeem its \$575 million 6.75% Notes due 2022. This amount included the \$575 million principal, a redemption premium of 3.375%, semi-annual interest and additional interest to the redemption date of October 26, 2015. The \$615.0 million was classified as "Other assets" on the Company's financial statements at September 30, 2015. On October 26, 2015, the Company redeemed all of its \$575 million 6.75% Notes due 2022. The Company has adjusted (or added back) \$2.8 million of interest at 6.75% for 26 days for October. The Company adjusted (or added back) \$3.7 million of interest for 34 days for the year-end.
- (3) The \$61,321 of Non-cash revenues includes \$5.4 million of additional amortization associated with the updated valuation of the assumed in-place leases recorded in fourth quarter of 2015.

Funds From Operations ("FFO"), Adjusted FFO and Adjusted Funds Available for Distribution ("FAD") are non-GAAP financial measures. For purposes of the Securities and Exchange Commission's Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that exclude amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable financial measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or include amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable financial measure so calculated and presented. As used in this press release, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently, FFO is defined as net income available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization and impairments on real estate assets. The Company believes that FFO, Adjusted FFO and FAD are important supplemental measures of its operating performance. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO described herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

The Company uses FFO, Adjusted FFO and FAD among the criteria to measure the operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization, impairments on real estate assets and gains or losses

from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and between other REITs. The Company offers these measures to assist the users of its financial statements in analyzing its operating performance and not as measures of liquidity or cash flow. FFO, Adjusted FFO and FAD are not measures of financial performance under GAAP and should not be considered as measures of liquidity, alternatives to net income or indicators of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on this measure as a substitute for any GAAP measure, including net income.

Adjusted FFO is calculated as FFO available to common stockholders excluding the impact of non-cash stock-based compensation and certain revenue and expense items identified above. FAD is calculated as Adjusted FFO less non-cash interest expense and non-cash revenue, such as straight-line rent. The Company believes these measures provide an enhanced measure of the operating performance of the Company's core portfolio as a REIT. FAD is calculated as Adjusted FFO less non-cash interest expense and non-cash revenue, such as straight-line rent. The Company's computation of adjusted FFO and FAD are not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes that they are appropriate measures for this Company.
