Jon S. Wheeler, Chairman and Chief Executive Officer, commented, “We achieved significant year-over-year increases in revenue, FFO, Core FFO and property NOI for the second quarter and six month period. Wheeler continues to remain a fast growing, acquisitive company. Over the last twelve months we have increased our total properties from twelve to twenty-three, GLA from 545,350 square feet to 1,294,572 square feet, and total assets from \$62.3 million to \$140.2 million. We are achieving these results due to an abundance of significant, quality shopping centers becoming available in the secondary and tertiary markets we target. Many of the acquisitions that Wheeler’s team has made have been locations our sales team has evaluated for years, and we feel this is the key element that allows us to take advantage of potential sales opportunities and also derive the most value from each property we acquire.”

Mr. Wheeler continued, “We are also beginning to benefit from growing to scale, as evidenced by general and administrative expenses decreasing as a percentage of revenues during the first half of 2014 as compared to the prior year. Finally, we understand that we have had to leverage the Company’s balance sheet in order to have the capital to continue to grow. However, our debt to total asset ratio decreased by 11.9% since March 2014. Overall, we are very pleased with the progression over the first half of 2014 and feel that the Company is now at a scale where our growth will translate into profitable operations in the coming months.”

Outlook for 2014

Mr. Wheeler concluded, “In the months ahead, we will continue to focus on improving operational efficiencies while sustaining a healthy rate of growth, as evident by the four properties the Company closed on and will begin to record revenue on in the third quarter. We will also strive to reduce leverage quarter over quarter with the long-term goal at around 55% debt to equity. In addition, based upon the broad pipeline of properties and development projects available in the secondary and tertiary markets in which we target this is an exciting time in our development and here at Wheeler, we remain committed to the Company’s longevity and growth.”

Financial Information

A copy of Wheeler’s Quarterly Report on Form 10-Q which includes the Company’s consolidated financial statements and Management’s Discussion & Analysis, will be available upon filing via the U.S. Securities and Exchange Commission website (www.sec.gov) or through Wheeler’s website at www.whlr.us.

FFO is a non-GAAP financial measure within the meaning of the rules of the Securities and Exchange Commission. Wheeler considers FFO to be an important supplemental measure of its operating performance and believes it is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate assets diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. Because FFO excludes depreciation and amortization unique to real estate, gains and losses from property dispositions and extraordinary items, it

provides a performance measure that, when compared year-over-year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities and interest costs, providing perspective not immediately apparent from net income.

Management believes that the computation of FFO in accordance with NAREIT's definition includes certain items that are not indicative of the operating performance of the Company's real estate assets. These items include, but are not limited to, non-recurring expenses, legal settlements, legal and professional fees, and acquisition costs. Management uses Core FFO, which is a non-GAAP financial measure, to exclude such items. Management believes that reporting Core FFO in addition to FFO is a useful supplemental measure for the investment community to use when evaluating the operating performance of the Company on a comparative basis. A reconciliation of non-GAAP financial measures is included in the accompanying financial tables.
