UiPath Accelerates New Agentic-led Software Testing Capability through Deloitte's ASCEND Delivery Platform

Together, UiPath and Deloitte will help organizations accelerate testing with agentic AI for enhanced resilience and innovation, enabling continuous autonomous quality

NEW YORK--(BUSINESS WIRE)-- [UiPath](#) (NYSE: PATH), a leader in agentic business orchestration, today announced an expanded collaboration with Deloitte to accelerate software development, testing and deployment for global organizations. This joint solution is designed to transform how testing teams operate by automating manual, repetitive tasks such as test design and reducing maintenance with self-healing execution by combining enterprise-ready agentic testing capabilities on Deloitte Ascend™, its engineering and service delivery platform, and UiPath Test Cloud.

The solution built on Deloitte Ascend™, works with clients' existing infrastructure, industry-specific data and processes, and Deloitte's network of alliances – empowering teams to collaborate, build and refine solutions quickly and securely. Powered by agentic AI, the new software testing solution proactively detects changes, generates tests, and executes them autonomously – enabling teams to focus on strategy and innovation rather than upkeep. Testers can now harness AI agents to analyze tens of thousands of test results, quickly pinpointing root causes, and uncovering patterns behind failures with precision.

By embedding UiPath Autopilot™ for Testers and Agent Builder into Ascend, Deloitte teams can harness 1,500 + prebuilt testing bots and domain-specific AI agents from day one to achieve up to 20% broader test coverage, 40% faster release cycles and 30% higher automation ROI.

“This collaboration redefines how testing is done in the AI era, where AI agents and testers work together to deliver speed, resilience, and innovation at scale,” said Gerd Weishaar, SVP of Product Management for UiPath Test Cloud. “Fusing UiPath Test Cloud with Deloitte Ascend makes autonomous, trustworthy quality a reality for every enterprise program.”

“With UiPath Test Cloud as the engine of our agentic testing capability, Deloitte Ascend can deliver broader coverage and faster time-to-value for our clients,” said Saurayan Chaki, quality engineering practice leader, Deloitte Consulting LLP.
