(6) Debt to NAV Ratio is calculated based upon the par value of debt
(7) Net debt in this ratio includes par value of debt less cash and cash equivalents

Conservative Leverage - Regulatory

Passage of the Small Business Credit Availability Act in December 2017 provides the opportunity for BDCs to obtain board or shareholder approval to access additional leverage by lowering the required asset coverage to 1.50x (from 2.00x)

MAIN has historically operated at conservative regulatory leverage levels, in all cases with significant cushion to the existing (2.00x) regulatory limits, and proven through historical performance that MAIN does not require access to additional leverage to generate market leading returns

MAIN's Historical Asset Coverage Ratio:	2014	2015	2016	2017	2018	Q1 19
Consolidated Asset Coverage Ratio - Regulatory (1)	2.93x	2.92x	2.97x	3.67x	3.22x	3.17x

(1) Calculated per BDC regulations; SBIC Debentures are not included as “senior debt” for purposes of the 200% Minimum Asset Coverage Ratio requirements pursuant to exemptive relief received by MAIN

(2) Minimum required asset coverage of 2.00x prior to passage of the Small Business Credit Availability Act. Minimum requirement of 2.00x remains in place for all BDCs unless board or shareholder approval is obtained to lower minimum requirement to 1.50x

Conservative Leverage - Excess Collateral Improves Over Time

MAIN's conservative use of leverage and equity to fund its growth results in significant excess collateral that provides protection to lenders

MAIN's management of its capital structure results in reduced risk profile for debt investors over time

Excess collateral available to unsecured lenders has increased by 81% since MAIN's first investment grade ("IG") debt issuance

Positive Impact from Rising Interest Rates

MAIN's capital structure and investment portfolio provides downside protection and the opportunity for significant benefits from a rising interest rate environment

- 67% of MAIN's outstanding debt obligations have fixed interest rates[(3)], limiting the increase in interest expense
- 72% of MAIN's debt investments bear interest at floating rates[(3)], the majority of which contain contractual minimum index rates, or "interest rate floors" (weighted-average floor of approximately 105 basis points)[(4)]
- Provides MAIN the opportunity to achieve significant increases in net investment income if interest rates rise

(2) Source: National Center for The Middle Market; includes number of U.S. domestic businesses with revenues between $10 million and $1 billion

(3) Weighted-average effective yield includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

Asset Management Business

MAIN's asset management business represents additional income diversification and the opportunity for greater stakeholder returns

MAIN's internally managed operating structure provides MAIN's stakeholders the benefits of this asset management business

- MAIN[1] provides asset management services, including sourcing, diligence and post-investment monitoring
- MAIN[1] receives 50% of the investment advisor's base management fee and incentive fees
