Audio, Dial-in International: (719) 325-4898

Audio, Conference ID: 9811208

Slide Presentation - www.webex.com, click on the 'Join' button and enter meeting number **194 569 017**

For individuals participating in the Investor Call and Slide Presentation, we request you please call into the audio and log into WebEx approximately 5-10 minutes before the start of the presentation so that we can begin promptly.

About CohBar

CohBar (OTCQX:CWBR) (TSX-V:COB.U) is a preclinical stage biotechnology company focused on the research and development of mitochondria based therapeutics (MBTs), an emerging class of drugs for the treatment of age-related diseases. MBTs originate from the discovery by CohBar's founders of a novel group of peptides within the mitochondrial genome which regulate metabolism and cell death, and whose biological activity declines with age. CohBar's efforts focus on the development of these mitochondrial-derived peptides (MDPs) into clinically relevant MBTs that offer the potential to address a broad range of age-

related diseases, including obesity, fatty liver disease (NASH), type 2 diabetes, cancer, cardiovascular and neurodegenerative diseases. To date, the Company and its founders have discovered more than 65 biologically active mitochondrial peptides.
