Notes to Reconciliations of Non-GAAP Financial Measures to the Comparable GAAP Financial Measures

Loss on the deconsolidation of Brazilian business – During the second quarter of 2011,

the Company completed the merger of our Brazilian business with and into Boa Vista Servicos, S.A. ("BVS") in exchange for a 15 percent equity interest in BVS. The Company recorded a \$27.8 million loss on the transaction. Management believes excluding the loss from certain financial results provides meaningful supplemental information regarding our financial results for the nine months ended September 30, 2011, as compared to 2012, since a loss of such an amount is not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historical performance and is useful when planning, forecasting and analyzing future periods.

Diluted EPS and net income from attributable to Equifax, adjusted for the loss on the deconsolidation of Brazilian business and acquisition-related amortization expense -

We calculate these financial measures by excluding the loss on the deconsolidation of our Brazilian business and acquisition-related amortization expense from the determination of net income attributable to Equifax in the calculation of diluted EPS. These financial measures are not prepared in conformity with GAAP. Management believes that these measures are useful because management excludes acquisition-related amortization expense and other items that are not comparable when measuring operating profitability, evaluating performance trends, and setting performance objectives, and it allows investors to evaluate our performance for different periods on a more comparable basis by excluding items that relate to acquisition-related intangible assets and items that impact comparability.

Adjusted operating revenue, excluding the results of our Brazilian operations-

Management believes excluding the Brazilian revenue from the calculation of operating revenue, on a non-GAAP basis, is useful because it allows investors to evaluate the Company's growth on a basis consistent with the current composition of our business.
