About Viveve

Viveve Medical, Inc. is a women's health company passionately committed to advancing new solutions to improve women's overall well-being and quality of life. The company's lead product, the internationally patented Viveve System, is a non-surgical, non-ablative medical device that remodels collagen and restores tissue with only one treatment session. The Viveve System treats the condition of vaginal laxity that can result in decreased physical sensation and sexual satisfaction. Physician surveys indicate that vaginal laxity is the number one post-delivery physical change for women, being more prevalent than weight gain, urinary incontinence or stretch marks. The Viveve Treatment uses patented, reverse-thermal gradient radiofrequency technology to tighten vaginal tissue in one 30-minute out-patient treatment in a physician's office. The Viveve System has received regulatory approval in many countries throughout the world and is available through physician import license in Japan. It is currently not available for sale in the U.S. For more information, please visit Viveve's website at www.viveve.com.
