# Cellectar Biosciences to Present at the 5th Annual SeeThru Equity Microcap Investor Conference

MADISON, Wis., May 24, 2016 (GLOBE NEWSWIRE) -- Cellectar Biosciences, Inc. (Nasdaq:CLRB), an oncology-focused biotechnology company, announces today its CEO, Jim Caruso, will be presenting at the 5<sup>th</sup> Annual SeeThru Equity Microcap Investor Conference on Tuesday, May 31, 2016 at 11:00 AM ET. The conference is being held at Convene, which is located at 730 Third Avenue in New York City.

"We will continue to actively engage and educate the investment community on the unique science and clinical potential of our Phospholipid Drug Conjugate (PDC) delivery platform and associated product pipeline," said Mr. Caruso. "The SeeThru Equity Microcap Investor Conference provides a meaningful opportunity to expand awareness of our novel technology and provide a company performance update."

Following the presentation, a link will be posted to the company's website and include the presentation and accompanying audio.

## **About Cellectar Biosciences, Inc.**

Cellectar Biosciences is developing phospholipid drug conjugates (PDCs) designed to provide cancer targeted delivery of diverse oncologic payloads to a broad range of cancers and cancer stem cells. Cellectar's PDC Delivery Platform is based on the company's proprietary phospholipid ether analogs. These novel small-molecules have demonstrated highly selective uptake and retention in a broad range of cancers. Cellectar's PDC pipeline includes product candidates for cancer therapy and cancer diagnostic imaging. The company's lead therapeutic PDC, CLR 131, utilizes iodine-131, a cytotoxic radioisotope, as its payload. CLR 131 is currently being evaluated under an orphan drug designated Phase 1 study in patients with relapsed or refractory multiple myeloma. The company is also developing PDCs for targeted delivery of chemotherapeutics such as paclitaxel (CLR 1602-PTX), a preclinical stage product candidate, and plans to expand its PDC chemotherapeutic pipeline through both in-house and collaborative R&D efforts.
