DelMar Pharmaceuticals Announces Approval for Listing on NASDAQ

DMPI to Begin Trading on NASDAQ Capital Market on July 12, 2016

VANCOUVER, British Columbia and MENLO PARK, Calif., July 11, 2016 /PRNewswire/ -- [DelMar Pharmaceuticals, Inc.](#) (OTCQX: DMPI) ("DelMar" and the "Company"), a company focused on developing and commercializing proven cancer therapies in new orphan drug indications, announced today that it has received approval from the Nasdaq Stock Market LLC ("NASDAQ") for the listing of its common stock on the NASDAQ Capital Market.

DelMar's common stock will begin trading on the NASDAQ Capital Market at the opening of trading on Tuesday, July 12, 2016 under the ticker symbol DMPI. The Company's common stock will continue to trade on the OTCQX exchange until the market close on June 11, 2016.

In honor of the listing, the Company will ring the Opening Bell at the NASDAQ MarketSite in Times Square, New York City, on Thursday, July 14, 2016 ([link to live webcast beginning at 9:20 am ET](#))

"Our listing on the NASDAQ marks the achievement of a major corporate milestone for our Company and is a testament to the progress that our team has made over the past few years," stated Jeffrey Bacha, chairman & CEO of DelMar Pharmaceuticals. "We believe that listing on NASDAQ will position us to broaden our shareholder base, increase appeal to institutional investors, provide improved liquidity and ultimately contribute to increasing shareholder value."

About DelMar Pharmaceuticals, Inc.

DelMar Pharmaceuticals, Inc. was founded to develop and commercialize new cancer therapies in indications where patients are failing or have become intolerant to modern targeted or biologic treatments. The Company's lead drug in development, VAL-083, is currently undergoing clinical trials in the U.S. as a potential treatment for refractory glioblastoma multiforme. VAL-083 has been extensively studied by the U.S. National Cancer Institute, and is currently approved for the treatment of chronic myelogenous leukemia and lung cancer in China. Published pre-clinical and clinical data suggest that VAL-083 may be

active against a range of tumor types via a novel mechanism of action that could provide improved treatment options for patients.
