# Boardwalktech Revenues Grow over 300% in 2009

Palo Alto, California – January 26, 2010

Boardwalktech, Inc, a leader in Enterprise 2.0 technology and developer of the patented Boardwalk Collaboration Platform (BCP), announced today that its revenue grew by 340% during 2009. Customers ranging in size from \$100m to over \$22B, including a "who's who" of companies across a wide spectrum of industries, have deployed BCP-driven processes. "With so many companies using spreadsheets to drive critical business processes in areas like sales & operations planning, project management, and financial applications, we are honored by the number of companies that have implemented BCP during 2009," said Andrew T. Duncan, President and CEO.

The Boardwalk Collaboration Platform (BCP) has gained significant momentum as the go-to solution for companies looking to automate their business processes. Using BCP, enterprise information workers can work on or offline in a familiar spreadsheet environment until they are ready to share their changes with other users. When ready, with the click of a button, changes can be automatically consolidated and shared between all Microsoft Excel® users and with backend systems. BCP's capabilities as a business process automation solution have provided measurable operational improvements and financial ROI for every company using BCP.

## About BCP

The Boardwalk Collaboration Platform (BCP) is a technology breakthrough that does for tabular data what relational systems did for file systems. It creates a collaborative, enterprise-class database environment for spreadsheet-based processes where users can continue to work with Excel on the desktop, but now there is a single version of the truth for the data along with enterprise-class access control, audit trail, and versioning – all at the cell level. Data from multiple ERP, SCM, CRM and other enterprise systems can be pulled into the BCP environment enabling intelligent, two-way collaboration between backend systems and users working within Excel on the desktop.

## About Boardwalktech, Inc.

Boardwalktech is a leader in Enterprise 2.0 Technology for business data and process management solutions. We help companies improve business results and shareholder value by providing a patented, next-generation database-driven technology platform that enables companies to automate existing and build new processes using spreadsheets as the user interface and the Boardwalk Collaboration Platform (BCP) as the back-end.
