Boardwalktech Releases Support for Microsoft Excel on Apple

Palo Alto, California – March 22, 2016

Boardwalktech, Inc., the leading provider of spreadsheet data management technology for the enterprise and developer of the patented Boardwalk Application Engine (BAE) announced today that its next generation information sharing for Excel Data spreadsheet is now being offered on the Apple Microsoft Office application environment.

Through collaboration with Microsoft and Apple, Boardwalktech now offers its cell-based data management system which connects multiple data environments across devices ranging from desktops, mobile, and web environments on the native Microsoft Excel application for the Apple platform.

Boardwalk's release on Apple makes it easier for enterprise customers to work across different functional groups which work on different platforms. Now, Boardwalk can be used to automate spreadsheet data collaboration and change consolidation across more groups within the enterprise with powerful capabilities like access control and an audit trail for cell-level data now available across heterogeneous desktop platform environments.

"As a global leader in enterprise spreadsheet data management, Boardwalktech is committed to enabling enterprise customers usage of our application across multiple platforms including Apple," said JB Kuppe, VP of Marketing for Boardwalktech.

"Spreadsheet data is used all across the enterprise including Apple desktops and we're committed to meeting all the platform requirements of our customers and partners."

About Boardwalktech:

Boardwalktech provides a patented, enterprise spreadsheet data management technology which automates and enterprise enables spreadsheet-based business processes making them collaborative and integrated with the extended enterprise.
