Allego announces a HPC Price Reduction in the Netherlands

ARNHEM, Netherlands – June 30, 2025—Allego N.V. (“Allego” or the “Company”), a leading provider of electric vehicle charging solutions, today announces a reduction in the HPC price in the Netherlands starting July 1st in a move set to provide meaningful relief to both consumers and businesses. The new rate will be €0.79 per kWh, a decrease from the current rate of €0.864 per kWh.

Details of the Price Reduction:

- Effective Date: July 1st
- New HPC Price: €0.79 per kWh
- Previous HPC Price: €0.864 per kWh

This reduction underscores the commitment to making energy more affordable for all in the Netherlands.

“HPC, or High-Power Charging, is at the forefront of the electric mobility revolution, enabling drivers to power up their vehicles in minutes rather than hours. At Allego, we are dedicated to making this advanced technology accessible and affordable for all,” said Jules Sommers, Managing Director for Allego Netherlands.

Ultra-fast or high-power charging (HPC) stations operate at 150 kW or higher, enabling significantly quicker charging times. With HPC, compatible vehicles can add hundreds of kilometers of range in under 20 minutes, making long-distance travel more convenient and reducing downtime for both private drivers and commercial fleets.

Allego also offers additional benefits for EV drivers who are looking to travel this summer. The Allego Summer Pass 2025 is a limited-time offer designed to make electric mobility even more accessible and affordable during the busy summer travel season. This subscription offers access to Allego’s extensive fast and ultra-fast charging network across Europe, with an exclusive 30% discount on local ad-hoc prices. To sign up, visit the official Allego website at www.allego.eu/summerpass/, complete the online registration, and you are ready to go!
