

# Stevanato Group, Gerresheimer and SCHOTT Pharma, Announce Strategic Industry “Alliance for RTU”

- **Market advances adoption of ready-to-use containers**
- **Improved operational efficiency in pharmaceutical manufacturing processes**
- **Increased patient safety with high-quality sterile primary packaging**

PIOMBINO DESE, Italy--(BUSINESS WIRE)-- [Stevanato Group S.p.A.](#) (NYSE: STVN), a leading global provider of drug containment, drug delivery and diagnostic solutions to the pharmaceutical, biotechnology and life sciences industries, together with [Gerresheimer AG](#) (MDAX: GXI) and [SCHOTT Pharma AG & Co. KGaA](#) (MDAX: 1SXP), announced today that they have entered into a strategic industry alliance ("Alliance for RTU") to support market adoption of Ready-to-Use (RTU) vials and cartridges.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20240926050295/en/>

The Alliance for RTU aims to share with pharmaceutical companies, CMOs and CDMOs expertise and technical knowledge in high-quality sterile primary packaging, specifically ready-to-fill vials and cartridges, highlighting RTU configurations' advantages over conventional bulk packaging.

## Reduced risks and lower total cost of ownership

Traditional fill&finish processes present several operational risks and require increased efficiency. By adopting an industrial ready-to-use (RTU) setup, pharmaceutical companies and Contract Manufacturing Organizations (CMOs) can benefit from reduced operational risks, enhanced flexibility and efficiency, and lower waste. RTU technology can help streamline processes, increase productivity, and thus lower total cost of ownership (TCO)

while reducing contamination risks and easing EU GMP Annex 1 compliance.

Pharmaceutical companies, CMOs and CDMOs opting for ready-to-use containers also can benefit from higher-quality products, which helps minimize the release of glass particles and risks of breakage or rejection while preserving the drug inside throughout its entire life cycle.

### **Open expert platform for RTU industry standard**

Additionally, the market is driving investment in advanced aseptic filling technologies due to increasing demand for injectable medicines and regulatory pressure to meet safety standards. In this context, the Alliance for RTU aims to create an expert platform open to other industry players to help industry manufacturers learn about the key benefits of RTU processes and products and to better evaluate investments for transitioning to efficient filling systems and meeting their unique needs from clinical applications to widespread commercial use.

*"RTU vials and cartridges represent a significant advancement in product quality, offering enhanced reliability and efficiency in pharmaceutical processes. This alliance allows us to highlight further how RTU solutions elevate standards across the industry, ensuring safer and more effective delivery of medications to patients worldwide," said Franco Stevanato, CEO at Stevanato Group.*

*"The shift towards ready-to-use vials and cartridges reflects a collective industry move to advance quality and efficiency in aseptic filling processes and this alliance shows readiness by expanding capacity and thereby supporting this market trend," said Andreas Reisse, CEO at SCHOTT Pharma. "Ready-to-use solutions can reduce complexities and better meet the stringent requirements of modern pharmaceutical production."*

*"As an industry, we are fully prepared for the transition to RTU vials and cartridges", said Lukas Burkhardt, Member of the Management Board of Gerresheimer AG. "With recent advancements, RTU processing is now a mature technology which will improve our customers operations in terms of efficiency, cost and time to market."*

The Alliance for RTU will be officially presented at the CPHI in Milan on October 8 during a dedicated event at the tradeshow fairground. For more information, visit [www.alliance-for-rtu.com](http://www.alliance-for-rtu.com).

### **About Stevanato Group**

Founded in 1949, Stevanato Group is a leading global provider of drug containment, drug delivery and diagnostic solutions to the pharmaceutical, biotechnology and life sciences industries. The Group delivers an integrated, end-to-end portfolio of products, processes and services that address customer needs across the entire drug life cycle at each of the development, clinical and commercial stages. Stevanato Group's core capabilities in scientific research and development, its commitment to technical innovation and its engineering excellence are central to its ability to offer value added solutions to clients. ## **Forward-Looking Statements**

This press release may include forward-looking statements. The words “aims”, “increase”, “lower”, “is driving”, “increasing”, “create”, “move”, “expanding”, “advance”, “can”, “will”, and similar expressions (or their negative) identify certain of these forward-looking statements. These forward-looking statements are statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the investments the Company expects to receive, the expansion of manufacturing capacity, the Company's plans regarding its presence in the U.S. and other markets, business strategies, the Company's capacity to meet future market demands and support preparedness for future public health emergencies, and results of operations. The forward-looking statements in this press release are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which the Company will operate in the future. Forward-looking statements involve inherent known and unknown risks, uncertainties and contingencies because they relate to events and depend on circumstances that may or may not occur in the future and may cause the actual results, performance or achievements of the Company to be materially different from those expressed or implied by such forward looking statements. Many of these risks and uncertainties relate to factors that are beyond the Company's ability to control or estimate precisely, such as future market conditions,

currency fluctuations, the behavior of other market participants, the actions of regulators and other factors such as the Company's ability to continue to obtain financing to meet its liquidity needs, changes in the political, social and regulatory framework in which the Company operates or in economic or technological trends or conditions. Readers should therefore not place undue reliance on these statements, particularly not in connection with any contract or investment decision. Except as required by law, the company assumes no obligation to update any such forward-looking statements.
