Our actual results could differ materially from those stated or implied in forward-looking statements due to a number of factors, including, but not limited to, the impact of the COVID-19 pandemic on U.S. and global markets, our business, operations, financial results, cash flow, demand for our products, sales cycles, and customer acquisition and retention; our ability to renew existing customers and attract new customers generally; our ability to successfully expand and compete in new geographies and industry verticals; our ability to maintain and scale our sales force; our ability to expand our service and application provider network; our ability to develop new product and platform offerings to expand our market opportunity, including with Yext Answers; our ability to release new products and updates that are adopted by our customers; our ability to manage our growth effectively; changes to our real estate strategy, in particular the timing of our exit of our existing global headquarters in New York, New York and the timing and size of our capital expenditures related to new facilities; weakened global economic conditions; the number of options exercised by our employees and former employees; and the accuracy of the assumptions and estimates underlying our financial projections. For a detailed discussion of these and other risk factors, please refer to the risks detailed in our filings with the Securities and Exchange Commission, including, without limitation, our most recent Quarterly Report on Form 10-Q and Annual Report on Form 10-K, which are available at http://investors.yext.com and on the SEC's website at https://www.sec.gov. Non-GAAP Measurements

In addition to disclosing financial measures prepared in accordance with U.S. generally accepted accounting principles (GAAP), this press release and the accompanying tables include non-GAAP net loss, non-GAAP net loss per share and non-GAAP net loss margin. Non-GAAP net loss per share and non-GAAP net loss margin are

financial measures that are not calculated in accordance with GAAP. We define these non-GAAP net loss financial measures as our GAAP net loss as adjusted to exclude the effects of stock-based compensation expenses. Non-GAAP net loss per share is defined as non-GAAP net loss on a per share basis. See "Reconciliation of GAAP to Non-GAAP Financial Measures" for a discussion of the applicable weighted-average shares outstanding. Non-GAAP net loss margin is defined as non-GAAP net loss divided by revenue. We believe these non-GAAP financial measures provide investors and other users of our financial information consistency and comparability with our past financial performance and facilitate period-to-period comparisons of our results of operations. With respect to non-GAAP net loss margin, we believe this metric is useful in evaluating our profitability relative to the amount of revenue generated, excluding the impact of stock-based compensation expense. We also believe these non-GAAP financial measures are useful in evaluating our operating performance compared to that of other companies in our industry, as these metrics eliminate the effects of stock-based compensation, which may vary for reasons unrelated to overall operating performance.

We use these non-GAAP financial measures in conjunction with traditional GAAP measures as part of our overall assessment of our performance, including the preparation of our annual operating budget and quarterly forecasts, to evaluate the effectiveness of our business strategies and to communicate with our Board of Directors concerning our financial performance. Our definition may differ from the definitions used by other companies and therefore comparability may be limited. In addition, other companies may not publish this or similar metrics. Thus, our non-GAAP financial measures should be considered in addition to, not as a substitute for, nor superior to or in isolation from, measures prepared in accordance with GAAP.

These non-GAAP financial measures may be limited in their usefulness because they do not present the full economic effect of our use of stock-based compensation. We compensate for these limitations by providing investors and other users of our financial information a reconciliation of non-GAAP net loss to net loss, non-GAAP net loss per share to net loss per share and non-GAAP net loss margin to net loss margin, the most closely related GAAP financial measures. However, we have not reconciled the non-GAAP guidance measures disclosed under "Financial Outlook" to their corresponding GAAP measures because certain reconciling items such as stock-based compensation and the corresponding provision for income taxes depend on factors such as the stock price at the time of award of future grants and thus cannot be reasonably predicted. Accordingly, reconciliations to the non-GAAP guidance measures is not available without unreasonable effort. We encourage investors and others to review our financial information in its entirety, not to rely on any single financial measure and to view non-GAAP net loss and non-GAAP net loss per share in conjunction with net loss and net loss per share.
