Balance Sheet

On August 30, 2021, the Company amended its existing \$300 million unsecured credit facility and \$50 million term loan. After the amendment, the new unsecured revolving credit facility is \$185 million with an expiration in August 2024. The new unsecured revolving credit facility may be extended, at the Company's option for two additional one-year periods, subject to customary conditions. Interest on the borrowings under the new unsecured revolving credit facility component can range from LIBOR plus 135 bps to 195 bps (150 bps at September 30, 2021), based on the Company's leverage ratio. Interest on borrowings under the unsecured credit facility is based on the Company's leverage ratio. The Company extended its \$50 million term note four years with an expiration in August 2026. As of September 30, 2021, the Company had \$66.0 million outstanding and \$117.9 million available for additional borrowings under its revolving credit facility and was in compliance with all financial covenants.

On September 9, 2021, the Company announced that it is exploring, among other alternatives, a potential sale or merger involving the entire Company, and alternatively the potential sale of its core grocery-anchored shopping center portfolio and its mixed-use redevelopment projects. As part of this dual-track strategic alternatives process, the Company has determined that certain of the Company's operating properties would be sold significantly prior to the end of their previously estimated hold periods. Therefore, the Company recorded \$82.7 million in impairment charges.

Non-GAAP Financial Measures

NAREIT-defined FFO is a widely recognized supplemental non-GAAP measure utilized to evaluate the financial performance of a REIT. The Company considers NAREIT-defined FFO to be an appropriate measure of its financial performance because it captures features particular to real estate performance by recognizing that real estate generally appreciates over time or maintains residual value to a much greater extent than other depreciable assets. The Company also considers Operating FFO to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit costs, amounts relating to early extinguishment of debt and preferred stock redemption costs, management transition costs and certain redevelopment costs. The Company believes Operating FFO further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items. NAREIT-defined FFO and Operating FFO should be reviewed with GAAP net income attributable to common shareholders, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance. A reconciliation of net income (loss) attributable to common shareholders to NAREIT-defined FFO and Operating FFO for the three and nine months ended September 30, 2021 and 2020 is detailed in the attached schedule.

EBITDAre is a recognized supplemental non-GAAP financial measure. The Company presents EBITDAre in accordance with the definition adopted by NAREIT, which generally defines EBITDAre as net income plus interest expense, income tax expense, depreciation, amortization, and impairment write-downs of depreciated property, plus or minus losses and gains on the disposition of depreciated property, and adjustments to reflect the Company's share of EBITDAre of unconsolidated affiliates. The Company believes EBITDAre provides additional information with respect to the Company's performance and ability to meet its future debt service requirements. The Company also considers Adjusted EBITDAre to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as management transition, acquisition pursuit and redevelopment costs. The Company believes Adjusted EBITDAre further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items. EBITDAre and Adjusted EBITDAre should be reviewed with GAAP net income, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance. EBITDAre and Adjusted EBITDAre do not represent cash generated from operating activities and should not be considered as an alternative to income from continuing operations or to cash flow from operating activities. The Company's computation of Adjusted EBITDAre may differ from the computations utilized by other companies and, accordingly, may not be comparable to such companies.

Same-property NOI is a widely recognized supplemental non-GAAP financial measure for REITs. Properties are included in same-property NOI if they are owned and operated for the entirety of both periods being compared, except for properties undergoing significant redevelopment and expansion until such properties have stabilized, and properties classified as held for sale. Consistent with the capital treatment of such costs under GAAP, tenant improvements, leasing commissions and other direct leasing costs are excluded from same-property NOI. The Company considers same-property NOI useful to investors as it provides an indication of the recurring cash generated by the Company's properties by excluding certain non-cash revenues and expenses, as well as other infrequent items such as lease termination income which tends to fluctuate more than rents from year to year. Same-property NOI should be reviewed with consolidated operating income, the most directly comparable GAAP financial measure.

Funds From Operations (“FFO”) and Operating Funds From Operations (“Operating FFO”)

FFO is a widely recognized supplemental non-GAAP measure utilized to evaluate the financial performance of a REIT. The Company presents FFO in accordance with the definition adopted by the National Association of Real Estate Investments Trusts (“NAREIT”). NAREIT generally defines FFO as net income attributable to common shareholders (determined in accordance with GAAP), excluding gains (losses) from sales of real estate properties, impairment write-downs on real estate properties directly attributable to decreases in the value of depreciable real estate, plus real estate related depreciation and amortization, and adjustments for partnerships and joint ventures to reflect FFO on the same basis. The Company considers FFO to be an appropriate measure of its financial performance because it captures features particular to real estate performance by recognizing that real estate generally appreciates over time or maintains residual value to a much greater extent than other depreciable assets.

The Company also considers Operating FFO to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as non-capitalized acquisition pursuit costs, amounts relating to early extinguishment of debt and preferred stock redemption costs, management transition costs and certain redevelopment costs. The Company believes Operating FFO further assists in comparing the Company’s performance across reporting periods on a consistent basis by excluding such items.

FFO and Operating FFO should be reviewed with GAAP net income attributable to common shareholders, the most directly comparable GAAP financial measure, when trying to understand the Company’s operating performance. FFO and Operating FFO do not represent cash generated from operating activities and should not be considered as an alternative to net income attributable to common shareholders or to cash flow from operating activities. The Company’s computations of FFO and Operating FFO may differ from the computations utilized by other REITs and, accordingly, may not be comparable to such REITs.

Earnings Before Interest, Taxes, Depreciation and Amortization for Real Estate (“EBITDAre”) and Adjusted EBITDAre

EBITDAre is a recognized supplemental non-GAAP financial measure. The Company presents EBITDAre in accordance with the definition adopted by NAREIT, which generally defines EBITDAre as net income plus interest expense, income tax expense, depreciation, amortization, and impairment write-downs of depreciated property, plus or minus losses and gains on the disposition of depreciated property, and adjustments to reflect the Company’s share of EBITDAre of unconsolidated affiliates. The Company believes EBITDAre provides additional information with respect to the Company’s performance and ability to meet its future debt service requirements.

The Company also considers Adjusted EBITDAre to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit, management transition, and redevelopment costs. The Company believes Adjusted EBITDAre further assists in comparing the Company’s performance across reporting periods on a consistent basis by excluding such items.

EBITDAre and Adjusted EBITDAre should be reviewed with GAAP net income, the most directly comparable GAAP financial measure, when trying to understand the Company’s operating performance. EBITDAre and Adjusted EBITDAre do not represent cash generated from operating activities and should not be considered as an alternative to income from continuing operations or to cash flow from operating activities. The Company’s computation of Adjusted EBITDAre may differ from the computations utilized by other companies and, accordingly, may not be comparable to such companies.

Same-Property Net Operating Income (“Same-Property NOI”)

Same-property NOI is a widely recognized supplemental non-GAAP financial measure for REITs. Properties are included in same-property NOI if they are owned and operated for the entirety of both periods being compared, except for properties undergoing significant redevelopment and expansion until such properties have stabilized, and properties classified as held for sale. Consistent with the capital treatment of such costs under GAAP, tenant improvements, leasing commissions and other direct leasing costs are excluded from same-property NOI. The Company considers same-property NOI useful to investors as it provides an indication of the recurring cash generated by the Company’s properties by excluding certain non-cash revenues and expenses, as well as other infrequent items such as lease termination income which tends to fluctuate more than rents from year to year.

Same-property NOI should be reviewed with consolidated operating income, the most directly comparable GAAP financial measure. Same-property NOI should not be considered as an alternative to consolidated operating income prepared in accordance with GAAP or as a measure of liquidity. The Company’s computations of same-property NOI may differ from the computations utilized by other REITs and, accordingly, may not be comparable to such REITs.
