Cabaletta Bio®

Cabaletta Bio to Participate in Upcoming December Investor Conferences

PHILADELPHIA, Nov. 23, 2020 (GLOBE NEWSWIRE) -- Cabaletta Bio, Inc. (Nasdaq: CABA), a clinical-stage biotechnology company focused on the discovery and development of engineered T cell therapies for patients with B cell-mediated autoimmune diseases, today announced that Steven Nichtberger, M.D., President and Chief Executive Officer, will participate in two upcoming investor conferences in December:

- **Piper Sandler 32nd Annual Virtual Healthcare Conference on Wednesday, December 2, 2020:** A pre-recorded fireside chat with Dr. Nichtberger is now available on the company's website.
- **Evercore ISI 3rd Annual Virtual HealthCONx Conference on Thursday, December 3, 2020:** Live fireside chat with Dr. Nichtberger at 9:15 a.m. ET.

All webcasts of presentations are available on the News and Events section of the company's website at www.cabalettabio.com. Following the presentations, a replay of the webcasts will be available on the website for 90 days.

About Cabaletta Bio

Cabaletta Bio is a clinical-stage biotechnology company focused on the discovery and development of engineered T cell therapies, and exploring their potential to provide a deep and durable, perhaps curative, treatment, for patients with B cell-mediated autoimmune diseases. The Cabaletta Approach to selective B cell Ablation (CABA) platform, in combination with Cabaletta's proprietary technology, utilizes Chimeric AutoAntibody Receptor (CAAR) T cells that are designed to selectively bind and eliminate only specific autoantibody-producing B cells while sparing normal antibody-producing B cells, which are essential for human health. The Company's lead product candidate, DSG3-CAART, is being evaluated in the DesCAARTes™ phase 1 clinical trial as a potential treatment for patients with mucosal pemphigus vulgaris, a prototypical B cell-mediated autoimmune disease. The FDA granted Fast Track Designation for DSG3-CAART in May 2020. For more information about the clinical trial, please see www.clinicaltrials.gov. The Company's lead preclinical product candidate, MuSK-CAART, is in IND-enabling studies and is designed as a potential treatment for patients with MuSK-associated myasthenia gravis. For more information, visit www.cabalettabio.com.
