FOR IMMEDIATE RELEASE

CHIMERA INVESTMENT CORPORATION REPORTS 2ND QUARTER 2023 EARNINGS

NEW YORK - (BUSINESS WIRE) - Chimera Investment Corporation (NYSE:CIM) today announced its financial results for the second quarter ended June 30, 2023.

Financial Highlights:

- 2ND QUARTER GAAP NET INCOME OF \$0.08 PER DILUTED COMMON SHARE
- 2ND QUARTER EARNINGS AVAILABLE FOR DISTRIBUTION⁽¹⁾ OF \$0.12 PER DILUTED COMMON SHARE.
- GAAP BOOK VALUE OF \$7.29 PER COMMON SHARE

Business Highlights:

Second Quarter

- Repurchased 5.8 million shares for \$33 million at an average price of \$5.66 per share.
- Settled \$475 million of non-qualifying investor owned residential mortgage loans and \$160 million of seasoned re-performing residential mortgage loans and contributed them to securitizations.
- Sponsored five securitizations during the quarter:
 - \$451 million CIM 2023-R3
 - \$67 million CIM 2023-NR2
 - \$394 million CIM 2023-R4
 - \$236 million CIM 2023-I1
 - \$239 million CIM 2023-I2
- Reduced our recourse financing exposure by \$509 million and replaced it with non-recourse financing.

“We believe that the steps we have taken during the first half of the year have put us in a good position to reduce our financing costs as well as to take advantage of future investment opportunities”, said Phillip Kardis, CEO.

(1) Earnings available for distribution per adjusted diluted common share is a non-GAAP measure. See additional discussion on page 6.

Earnings available for distribution

Earnings available for distribution is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains or losses on financial instruments carried at fair value with changes in fair value recorded in earnings, realized gains or losses on the sales of investments, gains or losses on the extinguishment of debt, changes in the provision for credit losses, other gains or losses on equity investments, and transaction expenses incurred. Transaction expenses are primarily comprised of costs only incurred at the time of execution of our securitizations and certain structured secured financing agreements and include costs such as underwriting fees, legal fees, bank fees and other similar transaction related expenses. These costs are all incurred prior to or at the execution of the transaction and do not recur. Recurring expenses, such as servicing fees, custodial fees, trustee fees and other similar ongoing fees are not excluded from earnings available for distribution. In addition, stock compensation expense charges incurred on awards to retirement eligible employees is reflected as an expense over a vesting period (generally 36 months) rather than reported as an immediate expense.

Earnings available for distribution is the Economic net interest income, as defined previously, reduced by compensation and benefits expenses (adjusted for awards to retirement eligible employees), general and administrative expenses, servicing and asset manager fees, income tax benefits or expenses incurred during the period, as well as the preferred dividend charges.

We view Earnings available for distribution as one measure of our investment portfolio's ability to generate income for distribution to common stockholders. Earnings available for distribution is one of the metrics, but not the exclusive metric, that our Board of Directors uses to determine the amount, if any, of dividends on our common stock. Other metrics that our Board of Directors may consider when determining the amount, if any, of dividends on our common stock include (among others) REIT taxable income, dividend yield, book value, cash generated from the portfolio, reinvestment opportunities and other cash needs. In addition, Earnings available for distribution is different than REIT taxable income and the determination of whether we have met the requirement to distribute at least 90% of our annual REIT taxable income (subject to certain adjustments) to our stockholders in order to maintain qualification as a REIT is not based on Earnings available for distribution. Therefore, Earnings available for distribution should not be considered as an indication of our REIT taxable income, a guaranty of our ability to pay dividends, or as a proxy for the amount of dividends we may pay. We believe Earnings available for distribution as described above helps us and investors evaluate our financial performance period over period without the impact of certain transactions. Therefore, Earnings available for distribution should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP. In addition, our methodology for calculating Earnings available for distribution may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and accordingly, our Earnings available for distribution may not be comparable to the Earnings available for distribution reported by other REITs.

The following table provides GAAP measures of net income and net income per diluted share available to common stockholders for the periods presented and details with respect to reconciling the line items to Earnings available for distribution and related per average diluted common share amounts. Earnings available for distribution is presented on an adjusted dilutive shares basis.

Economic Net Interest Income

Our Economic net interest income is a non-GAAP financial measure that equals GAAP net interest income adjusted for net periodic interest cost of interest rate swaps and excludes interest earned on cash. For the purpose of computing economic net interest income and ratios relating to cost of funds measures throughout this section, interest expense includes net payments on our interest rate swaps, which is presented as a part of Net gains (losses) on derivatives in our Consolidated Statements of Operations. Interest rate swaps are used to manage the increase in interest paid on secured financing agreements in a rising rate environment. Presenting the net contractual interest payments on interest rate swaps with the interest paid on interest-bearing liabilities reflects our total contractual interest payments. We believe this presentation is useful to investors because it depicts the economic value of our investment strategy by showing all components of interest expense and net interest income of our investment portfolio. However, Economic net interest income should not be viewed in isolation and is not a substitute for net interest income computed in accordance with GAAP. Where indicated, interest expense, adjusting for any interest earned on cash, is referred to as Economic interest expense. Where indicated, net interest income reflecting net periodic interest cost of interest rate swaps and any interest earned on cash, is referred to as Economic net interest income.

The following table reconciles the Economic net interest income to GAAP net interest income and Economic interest expense to GAAP interest expense for the periods presented.

The table below shows our Net Income and Economic net interest income as a percentage of average stockholders' equity and Earnings available for distribution as a percentage of average common stockholders' equity. Return on average equity is defined as our GAAP net income (loss) as a percentage of average equity. Average equity is defined as the average of our beginning and ending stockholders' equity balance for the period reported. Economic Net Interest Income and Earnings available for distribution are non-GAAP measures as defined in previous sections.
