Ingram Micro Reports Second Quarter Financial Results

IRVINE, Calif.--(BUSINESS WIRE)-- Ingram Micro Inc. today announced financial results for the second quarter ended Jul. 1, 2017.

Second Quarter Results of Operations

Ingram Micro continued to experience solid demand across the majority of its largest countries, led by strength in technology solutions and mobility distribution. Worldwide 2017 second quarter sales were \$10.83 billion, an increase of 7 percent in USD, with gross margin of 6.54 percent. This compares to sales of \$10.12 billion and gross margin of 7.10 percent in the 2016 second quarter. The translation of foreign currencies versus last year had a negative impact of 1 percentage point on worldwide sales. Recent acquisitions contributed approximately 1 percentage point of growth to 2017 second quarter worldwide sales. 2017 second quarter non-GAAP operating income was \$156 million, or 1.44 percent of revenue, and non-GAAP net income was \$93 million. This compares to 2016 second quarter non-GAAP operating income of \$157 million, or 1.55 percent of revenue, and non-GAAP net income of \$92 million.

2017 second quarter gross margin, non-GAAP operating income and non-GAAP net income were impacted by a higher mix of sales of consumer focused product lines, particularly in international markets, as well as by strategic investments in the company's cloud and commerce and fulfillment businesses and lower profit contribution from the company's U.S. mobility business.

2017 second quarter GAAP operating income and net income was \$91 million, or 0.84 percent of revenue, and \$45 million, respectively, including:

- The pre-tax negative impact of approximately \$42 million in restructuring, merger, acquisition and transition costs primarily related to retention payments and the vesting of restricted shares and stock options due to HNA Group's acquisition of Ingram Micro; and
- The pre-tax negative impact of \$23 million in amortization expense.

This compares to 2016 second quarter GAAP operating income and net income of \$97 million, or 0.96 percent of revenue, and \$55 million, respectively.

Non-GAAP Disclosures

In addition to GAAP results, Ingram Micro is reporting non-GAAP operating income, non-GAAP operating margin and non-GAAP net income. These non-GAAP measures exclude charges associated with reorganization, merger, acquisitions, integration and transition costs, including those associated with the company's previously announced cost savings

programs, and the amortization of intangible assets. These non-GAAP financial measures also exclude a loss on the sale of affiliate and a gain related to a legal settlement in the 2016 second quarter. Non-GAAP net income also exclude the impact of foreign exchange gains or losses related to the translation effect on Euro-based inventory purchases in Ingram Micro's pan-European entity. 2017 year-to-date non-GAAP net income also excludes a non-cash tax benefit primarily related to the reversal of a valuation allowance against certain deferred tax assets in Australia.

The non-GAAP measures noted above are primary indicators that Ingram Micro's management uses internally to conduct and measure its business and evaluate the performance of its consolidated operations and operating segments. Ingram Micro's management believes these non-GAAP financial measures are useful because they provide meaningful comparisons to prior periods and an alternate view of the impact of acquired businesses. These non-GAAP financial measures are used in addition to and in conjunction with results presented in accordance with GAAP. These non-GAAP financial measures reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, provide a more complete understanding of factors and trends affecting Ingram Micro's business. A material limitation associated with these non-GAAP measures as compared to the GAAP measures is that they may not be comparable to other companies with similarly titled items that present related measures differently. The non-GAAP measures should be considered as a supplement to, and not as a substitute for or superior to, the corresponding measures calculated in accordance with GAAP.

A reconciliation of GAAP to non-GAAP financial measures for the periods presented is attached to this press release.

About Ingram Micro Inc.

Ingram Micro helps businesses realize the promise of technology™. It delivers a full spectrum of global technology and supply chain services to businesses around the world. Deep expertise in technology solutions, mobility, cloud, and supply chain solutions enables its business partners to operate efficiently and successfully in the markets they serve.
