Vuzix Receives Additional Smart Glasses Order from 1Minuut Innovation in Response to COVID-19 Remote Healthcare Needs in the Netherlands

Vuzix and 1Minuut Innovation to host a webinar to discuss COVID-19 virtual patient telemedicine care and training use cases

ROCHESTER, N.Y., April 7, 2020 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced Vuzix and 1Minuut Innovation will be hosting a webinar on Thursday, April 9th at 11:30 AM ET and that the Company continues to receive additional smart glasses orders from 1Minuut Innovation to support their efforts to meet time-sensitive COVID-19 remote healthcare needs in the Netherlands.

1Minuut's main focus is to deliver highly secured video streaming and recording through their Genzō mobile software platform. Genzō facilitates an easy-to-use, safe and mobile telemedicine communications platform to chat or video call using Vuzix Smart Glasses, delivering medical expertise across multiple use cases in healthcare. The Point of View (PoV) of the care practitioner wearing the Vuzix Smart Glasses makes it easy for external highly skilled colleagues to provide help and instruction. The care practitioner has their hands free while receiving visual and voice expert feedback on their Vuzix Smart Glasses,

allowing them to perform tasks without interruption. Using AR overlays, Genzō makes it easy to point to a certain area on the live video screen or give textual feedback. Integration of medical company policies and protocols while sending telemedicine sessions on the smart glasses is also possible with Genzō. Genzō uses 'HIPAA compliant equivalent' EU-based GDPR-compliant software (ISO27001 and NEN7510) to share (push and pull) medical data safely to and from patient files.

If you're interested in learning more about this virtual patient care and training solution you can register for the upcoming webinar via the link below.
