Envirotainer Deploys Vuzix Smart Glasses-Based Remote Training to Support its Active Temperature-Controlled Containers for COVID-19 Vaccine and Pharmaceutical Shipments

ROCHESTER, N.Y., Dec. 17, 2020 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that [Envirotainer](#), the global market leader in secure cold chain solutions for air transport of pharmaceuticals, has successfully deployed an AR smart glasses-based remote training program globally utilizing Vuzix M400 Smart Glasses to support their fleet of more than 6,000 active temperature-controlled containers which are being used today to ship COVID-19 vaccines, as well as other pharmaceuticals in need of a temperature-controlled environment.

The arrival of COVID-19 presented new challenges for Envirotainer's operations to hold on-site trainings in their more than 50 stations across to world, in line with the regulatory compliance and inspection requirements. With the limitation of global travel, Envirotainer turned to Vuzix M400 Smart Glasses equipped with Vuzix Remote Assist (VRA) software that is being used to connect trainers remotely to their partners on-site at field stations to guide them through detailed training requirements.

"We experimented with other smart glasses in the past but with the arrival of the COVID-19 pandemic we quickly turned to Vuzix as a business partner to help solve operational

challenges related to training our staff in the field," commented Niklas Adamsson, Chief Operating Officer at Envirotainer. "We look forward to expanding the use of AR smart glasses over time to support more extensive use cases."

"Envirotainer is another great example of how companies are turning to Vuzix Smart Glasses to deliver cost-effective solutions, including alternatives to in-person gatherings and enablement of advanced remote support for field technicians," said Paul Travers, President and Chief Executive Officer at Vuzix.

About Envirotainer

Envirotainer is the global market leader in secure cold chain solutions for air transport of pharmaceuticals. The company develops, manufactures and offers leasing of innovative container solutions, including validation, support and service, for pharma products that require a controlled environment. Thanks to a truly global presence with the world's largest active container fleet, the most extensive network and more than 35 years of industry expertise, Envirotainer is able to meet the customers' need for innovative and reliable solutions - available from any location to any destination. The company operates through an open, global network of airlines and forwarders and the headquarters is located outside of Stockholm, Sweden. For more information, please visit www.envirotainer.com.
